VOLUME XXXII

OF THE

**District Gazetteers of the United Provinces
of Agra and Oudh.**

ALLAHABAD:

PRINTED BY THE SUPERINTENDENT, GOVERNMENT PRESS, UNITED PROVINCES.

1921.

Corrections to be made in the Gazetteer of Gorakhpur district.

CHAPTER I.

Page 1 line 14 *after* "year to year" *insert* "mainly."

„ 1 „ 19, *alter* 2,889,043 to 2,899,043.

„ 1 „ 20, „ 4,514'13 to 4,529'7.

„ 1 „ 21, „ 2,899,712 to 2906,533.

„ 1 „ 21, „ "orders" *delete*—

"The district is thus far larger" and *insert*

"In the quinquennial period 1912-13 there was a net loss of 4,191 acres in the Bansgaon tahsil, which was however counter-balanced in part by gains of 1,128 acres in Deoria and 511 acres elsewhere; the average area during the period was 2,897,855 acres, while the actual area in 1912-13 was 2,895,582 acres only. Since then, a large tract measuring 2,977 acres situated between the two streams of the Ghogra near Panian has been transferred to Azamgarh by virtue of a decree based on an agreement between the late Raja of Majhauri, proprietor of Painan, and M. Ihtisham Ali, proprietor of Mainapur, in district Azamgarh. In spite of all these losses within recent years the district is far larger
. . . "

Page 2, line 14, *for* "for the most part" *read* "entirely."

„ 2 „ 6, *before* "the outer," *insert* "though the whole district is absolutely flat, its highest point being only 386 feet above the sea . . . "

Page 3, line 2 *for* "rivers" *read* "river."

„ 3 „ 24 *after* "soil" *add* "note; analysis shows varying amounts up to as much as 50 per cent. in some cases."

Page 3 line 17, *after* "district" *add* "A scrutiny of the height of the G. T. Survey Stations and an examination of the areas concerned shows existence of a line of depression from the north-east corner of the district near and north of Domakhand across the Nagwa-Sonari forest to the Rohin valley, so that in the case of any heavy flood on the Great Gandak the water of that river spills across the north of the district into the Rohin valley, and it would seem not impossible that in case of an extraordinary flood in the Great Gandak that river might change its course cutting across to the Rapti valley, and so continuing the south-west direction in which it flows for many miles before reaching

the N.-E. corner of the district where it turns abruptly to the S.-E."

Page 3, line 34, *after* "district" *insert* "though it is probable that this fact is largely responsible for the almost complete freedom from plague always enjoyed by the northern half of the district, as this style of house harbours rats to a much less extent than the usual sun-dried or burnt-brick or mud-walled house."

Page 4, line 32, *for* "Kuwana" *read* "Kuano."

BANDHS.

Page 5, *after* line 12, *insert* the following paragraphs marked "bandhs"—

"Of late years however several protective bandhs have been built. The largest of these is the Molony Bandh, an embankment 16 miles in length from the pontoon bridge near Bhawapar on the Rapti to Kuin Bazar, where high ground is met. It hugs the left or east bank of the river and was constructed as a famine relief work during the cold weather of 1906-07 and designed to protect the eastern kachar from the floods which have so often devastated it. The embankment varies from three to 12 feet in height with a minimum uniform breadth of four feet at the summit, save where it crosses the Lahsari nala, the channel excavated in a misguided attempt to drain the Ramgarh Tal; at this point it rises to a height of 30 feet and is some 12 feet wide on the crest. Besides this, roadside bandhs have been carried along the western side of the Azamgarh road from the pontoon bridge, round by the old distillery near Birdghat, and continued by the old Jail and Ilahi Bagh to the railway embankment near Domingarh.

"The construction of the Molony Bandh, while undoubtedly benefiting the eastern side of the river, has forced the water to take a more westerly course, and there is no doubt that more damage is now done by inundation than was formerly the case, and the water being headed up to some extent has forced its way across into the Ami valley to a greater degree than heretofore. Thus part of the old embankment of the Basti road between Birdghat and Kalesar was recently carried away owing to a southerly set of the river. This has necessitated a realignment of the road

five miles from Gorakhpur, while the rest of the bandh has been considerably strengthened and extended as far as Sahjanwa ; while a branch of this, known as the Bukhta Bandh, is carried from Kalesar as far as the railway embankment near the railway bridge over the Rapti, four miles east of Sahjanwa. These bands are all two feet above high flood level. There are other bandhs higher up the Rapti valley constructed by the owners of the Peppi Estates and other zamindars, but there has been no general scheme and the absence of this has deprived the works of much of their usefulness. Many villages are very anxious for bandhs to be made and are quite willing to pay a rate for this. It is however of no use making more isolated bandhs. What is required is a proper hydrographic survey of the valley of the Rapti to determine where bandhs should be made and what other training works are required. Mr. S. Athin, Superintending Engineer, was appointed to do this in February, 1916, but so late in the season that he was unable to touch more than the fringe of what was required. Stress of the war and consequent shortness of staff has since prevented anything further being done in this connection."

Page 5, line 19 *delete* " at the same time."

FLOODS.

Page 6, line 2 *after* " recorded in 1889 " *insert*—

" In the latter half of July 1910 the rainfall, especially in the north of the district, was exceedingly heavy. From the 16th to the 30th 25·86 inches were accorded at the Mahrajgunj tahsil and there can be no doubt that very heavy falls occurred in the foothills of the Nepal Himalayas. As a result two large irrigation drains on the Peppi estate in the north of the Basti district burst and their contents went to swell the floods in the Rapti valley.

"Anxiety was first felt on the 27th June, when, following on falls in Mahrajganj of 3·90 inches on the 23rd, 5·54 on the 24th, 6·55 on the 25th, and 3·64 on the 26th, the Rapti rose with great rapidity. By the 31st it reached its maximum, which was also the highest flood level on record. At the Sahjanwa railway bridge, the flood level was 253·50 as compared with the previous record of 253·25 on the 4th August, 1889, and at the

Ilahi Bagh sluice gates it reached 16 feet 2 inches on the gauge, compared with 16 feet $\frac{1}{2}$ inch the previous maximum.

"It was clear on the 27th July, that extraordinary efforts were necessary to prevent the water sweeping over the Azamgarh road and so flowing back in the city. A small roadside bandh was already in existence; this was rapidly strengthened and enlarged and eventually proved sufficient to prevent any encroachment east of the road. The Molony bandh however, which runs from the Azamgarh road to the village of Kulu, a distance of 16 miles along the left or east bandh of the Rapti, was seriously breached at the 13th mile. On the Tucker bandh on the main road to Azamgarh, at the first bridge, 14 miles from Gorakhpur, the water reached the roadway and the down-stream portion of one of the piers of the bridge fell in. For some time there seemed a possibility that at least one span of the bridge would be washed away, but the subsidence of the floods in the beginning of August enabled urgent repairs to be carried out and the bridge was eventually saved.

"Notwithstanding the enormous area covered by the floods, only one human being was drowned. Nor was the mortality among cattle serious. The grazing grounds were however under water for a considerable time and there was widespread loss of fodder. Some of the reserved forest blocks were thrown open to free grazing and passes for 13,200 cattle were issued for these areas.

"A small amount of relief was granted in the shape of doles of grain, the funds being obtained by public subscription and administered by committees in the affected tracts."

Page 7, line 11, *delete* "recently."

„ 7, lines 13-15, *delete* "A railway . . . Bagaha," and *substitute*—

"A fine railway bridge of 15 spans, measuring 2,230 feet, has recently been constructed over the river and was opened to traffic in 1912; the connected training works have done much to fix the course of the river for several miles above the bridge. Elsewhere . . . "

Page 8, line 20, *delete* "It is crossed . . . other places," and *substitute*—

"It is crossed by bridges at Hetimpur and at Sirsia, and by ferries at Captainganj and one or two other places."

Page 9, line 26, *for* "by a pontoon Birdghat" *read* "by pontoon bridges at Bhawapar and Birdghat . . ."

Page 11, lines 23-25, *for* "is filled . . . country" *read* "was formerly only filled with flood water from the Rapti to the great detriment of the surrounding country."

"This channel has however gradually deepened until it now carries in the cold weather practically as much water as the main stream of the Rapti, and threatens to become before long the main stream of that river."

Page 11, line 25 *delete* "Further south." *Delete* from page 12, line 36 starting "under existing circumstances . . ." to page 13, line 19 ending " . . . crest " and *substitute*—

"The various bandhs erected in recent years have already been noticed. It is however doubtful whether it would be possible or advisable to close up all the channels by which flood water can escape, certainly not until the whole Rapti valley has been properly examined by an Irrigation officer."

Page 13, line 33, *delete* "and has never since been repaired," and *substitute* "and it has only recently been replaced by a screw-pile bridge."

Page 16, line 11 *delete* "recently."

„ 16 „ 15 *add* after "banks"—"It is however doubtful whether the exclusion of the flood waters of the Rapti and the consequent cessation of the flushing out of the Ramgarh Tal has not caused a deterioration of the healthiness of its neighbourhood, more especially as of late years there has been a serious spread of the water hyacinth (*Elchornis crassipes*) over the Tal."

Page 18, line 28 to page 19, line 15, *delete* whole paragraph:—

"Taking . . . tahsila " and *substitute* "Taking the average of the returns for the five years ending 1912-13, the total area of barren and uncultivated land including the reserved forest amounts to 771,475 acres, or 23·7 per cent. of the entire district, if the forest area be excluded."

"The area shown as totally barren amounts to 236,323 acres; this includes 86,561 acres permanently occupied by railways,

roads, buildings, and the like, and 118,735 acres covered with water; for the five years ending 1907,08, the average area covered with water was 128,695 acres; this shows to what extent small tals have been brought into cultivation within the last few years. Thus there are only 31,028 acres actually barren and unfit for cultivation, nearly half of which consists of sterile sand along the course of the Ghagra in tahsils Bansgaon and Deoria. The balance shown as culturable is 535,152 acres; from this again must be deducted 64,082 acres of groves, 6,592 acres under preparation for sugarcane and 79,675 acres of new fallow, left temporarily untilled under the ordinary system of rotation.

“ This leaves 161,123 acres of old fallow and 223,679 acres of unbroken waste, called banjar. The latter includes both Government and private forests and nearly two-thirds of it are to be found in Mahrajganj tahsil, and the bulk of the remainder is in Padrauna and Gorakhpur. Apart from the forests, there is a residue of nearly 90,000 acres occupied for the most part by scrub jungle and grass pasture. Of late years there has been a marked expansion of tillage; for the five years ending 1907-08 the area of banjar was 235,507 acres and of old fallow 187,822 acres thus within the last few years 38,527 acres have been brought into cultivation. Still the area of old fallow is far from negligible even in the southern tahsils, and in spite of the density of the population there can be no doubt that the district has by no means reached the limit of cultivation, and under favourable circumstances a still further expansion of tillage may be expected.”

Page 20, line 28, *after* “Deputy Conservator” *read* “or Assistant Conservator.”

Page 21, line 6, *for* “Ranges” *read* “forests.”

„ 21, „ 11, *delete* “and the only . . . uliginosa” and *insert* “and the most common trees are Jamun (*Eugenia Jambolana*), Paniari (*Barringtonia acutangula*), Panar (*Randia uliginosa*), Bhaisa (*Salik tetrasperma*) and Bhillaur (*trewia nudiflora*).”

Lines 17 and 18, omit the words “in the Northern and Central Ranges.”

Page 21, line 21, for "103.05 square miles" read "64,072 acres."

Page 21, line 23 to page 24, line 31, for "Big trees are scarce except perhaps in the north, etc.," substitute "Big trees are very scarce everywhere, as practically all the saleable material had been cut before the forests were reserved. There are a few large trees in the northern forests but most of them are unsound, knotty, and crooked, while in nearly every case they have been tapped for resin, a practice which has been disallowed since about 1860.

"The bulk of the crop has developed from the saplings and seedlings left by the timber contractors who worked in the forests before they were reserved. Most of these younger trees are sound and straight; the best specimens occur in Nagwa and Sonari forests and in the small Tulsi Ram block near Nichlaur, but in many other parts the sal is of very fair quality and the sal forests generally are very promising. Natural reproduction is irregular but has increased considerably during the last few years. Over fairly large areas it is very good wherever the overhead cover is not too dense, but elsewhere it is held back by unfavourable soil conditions, grass and thick undergrowth of inferior species. The sal tends to disappear wherever the drainage is defective or the soil stiffens into heavy clay, even trivial depressions in the midst of the sal area often forming blanks devoid of seedlings. There is one enormous blank to the east of Nagwa forests, but this appears to owe its origin to the reclamation of the land for cultivation at a recent date. In the grass lands at the edge of the sal blocks there is sometimes an abundant growth of "asna" (*Terminalia tomentosa*). Other useful timbers that are found in the sal forests are Panan (*Eugenia dalbergioides*), Haldu or Karma (*Adina cordifolia*), Bijasal (*Pterocarpus Marsupium*), Kaim or Tikkoe (*Stephegyne parvifolia*) and Gambhar (*Gmelina arborea*). Miscellaneous forest is found on the intermediate levels but its extent is nowhere great save in Domakhand. The "Jamun" (*Eugenia Jambolana*) grows very freely along the banks of water courses but seldom attains in any size. Khair (*Acacia catechu*) is not uncommon in Dhomakhand and along the banks of the Piyas in Nagwa and Sonari and is occasionally exploited for the extraction of "katha" or "cutch."

“Semal (*Bombax malabaricum*) occurs throughout the forests and must at one time have been very common near the Gandak in the Domakhand reserve. Shisham (*Dalbergia Sissoo*) is also found as an indigenous species along the Gandak but is not common. It has been planted on a large scale in several other localities, notably at Sakhui in the south-west of Nagwa, where 2,080 acres of grass and fallow land were planted up between 1881 and 1885. Small experimental plantations of teak (*Tectona grandis*) have been made at different times and this tree is found to grow very well in Gorakhpur, although it is unlikely that it will ever yield timber of very large dimensions. Many other species occur but most of them are of little or no value as far as is known at present. The total number of species that have been found in the Gorakhpur forests, including trees, shrubs, and climbers, is 220. This number includes several only found further east as the Gorakhpur jungles (thanks apparently to the westerly course of the Great Gandak before reaching the district) seem to be the eastern boundary of many species found in the Eastern Sub-Himalaya jungles.

MANAGEMENT.

“The forests are divided into seven Ranges, the charge of which is held by Rangers or Deputy Rangers subordinate to the Divisional Forest Officer. Foresters are attached to some of the larger ranges to assist in carrying out cultural operations, markings, and other special works, and the whole division is subdivided into 39 beats each being in the charge of a Forest Guard. During the working season an additional staff of expert moharrirs and chaprasis is entertained for supervising the contractors' work, and from March to June fire-watchers are employed. Fire conservancy was first started in 1875 and has been very successful. Owing to the damp climate and the annual cutting of the grass for thatching purposes fires do not often break out, while such outbreaks as do occur are easily controlled owing to the good system of firelines. These firelines were laid out in 1892 and 1893 and are cleared every year before the forests and the grass lands are dry enough to burn. The total length of the firelines is 134 miles and the average annual cost of fire-protection is about Rs. 2,500.

“Further protection is afforded by the numerous roads, aggregating 289 miles in length, which have been constructed by the department.

“There are rest-houses at Ramgarh, Campierganj, Pharenda, Surbar, Bhelampur, Banki, Pakri, Jagpur, Lachmipur, Tehrighat, Kushmahwa, Madhaulia, Dibhar, and Nichlaul.

EXPLOITATION.

“Before the forests were reserved, the purchasers of the forest produce were at liberty to cut whatever and wherever they liked. In 1865 Mr. Tebber, Forest Surveyor, in his report on the condition of the Gorakhpur Government Forests, wrote that practically nothing remained except saplings and seedlings and a few old crooked and defective trees. Orders were given in 1863 that only unsound trees should be felled, but these orders were not properly enforced until some years later. From 1868 young untrained men without any experience of forest work were employed as forest officers to hold charge of the Gorakhpur Forest Division, the first being appointed in 1868. There is frequent reference in their annual reports to the extension of cultivation, which was evidently still going on in the Government Forest especially in Nagwa and East Lohra blocks. There was no definite scheme of management before 1874, the general policy at this period being merely to let the existing crop of young saplings and poles grow up into saleable material, and to realise a little revenue out of the sale of thatching grass and unsound trees and from grazing fees.

“The disposal of unsound trees was, however, effected by the permit system under which permit holders owing to inadequate supervision were able to cut large numbers of young sound trees and it was not until about 1883 that a final stop was put to this practice.

EARLY WORKING PLANS.

“The first real working plan was compiled in 1874, but this proved impracticable owing to the limited demand for forest produce and was cancelled in 1876, from which year to 1887 work was conducted on the lines of notes drawn up by Mr. Greigh; in 1887 a rough plan was drawn up but was not sanctioned, and the same fate attended plans submitted in 1889 and 1891.

WORKING PLAN, 1893—1913.

"In 1893 a plan was submitted by Mr. Mercer, and Mr. Harsarup, in accordance with notes drawn up by Mr. Eardly-Wilmot. This was introduced simultaneously with a re-arrangement of the forest administration. The two existing ranges were divided into three: the Southern range, comprising, the forests of Ramgarh, Tilkonia, Bhelampur, Banki, Bhari, Babban, Bhari Bhaisi, Chhitahi, and West Lehra; the Central range, comprising East Lehra Forest, East Lehra Majhar, Dudhal Forest, and Dudhal Majhar; and the Northern range, formed out of the forests of Nagwa, Sonari, and Domakhand with the two small outlying tracts of Tenduba and Gopalganj. This working plan was written to cover a period of 20 years and in 1913-14 a new-working was drawn up by Mr. Marriot in accordance with notes made up by Mr. Clutterbuck, Conservator of Forests, and has been sanctioned by Government.

PRESENT WORKING PLAN, 1914 onwards.

"It divides the forests into four working circles.

"Working circle I is sub-divided into W. C. I. A. (Ramgarh, Tilkonia, Bhilampur, and Banki Forest) and W. C. I. B. (Bhari, Babban, Bhari Baisi, Chhitani, and W. Lehra Forests). Working circle I is worked under a system of clear fellings, the regeneration of the cleared areas being obtained partly by natural and partly by artificial means. A great deal of attention is paid to the protection and tending of the young plants, and frequent thinnings and cleanings are prescribed in order to give the new crops every advantage. This intensive work in Working Circle I is made possible by the great demand that has grown up for produce of these forests owing to their isolated position in the middle of thickly-populated country and to good communications between them and Gorakhpur. They yield about Rs. 10 per acre per annum at present and are perhaps the only forests in India in which it is practicable as yet to adopt an intensive system of management that almost comes up to European standard. The forests of working circle Ib are not being regularly worked at present, as they suffered very much from drought in 1910, and re-generation in them is in a backward state.

“ Eventually it is intended to work them similarly to the forests in working circle Ia, as their close proximity to the railway ensures a good demand for all the produce they can yield.

“ Working Circle II includes the large sal forests in Dudhai, East Lehra, Nagwa, and Sonari blocks, which have gradually been growing up into valuable forests during the last half century; fellings having been restricted, ever since they were first reserved in 1855 to 1863, to the removal of decayed and valuable trees. Under the present working plan, overmature and crooked trees are being removed as well as unsound trees and these yield a large quantity of serviceable timber although of somewhat poor quality. Forestry is to a great extent a question of communications, and when the proposed new branch railway lines are opened it will be possible to work the Government sal forest in the north of the district as intensively as those in Working Circle I.

“ Working Circle III consists of the extensive grass lands of East Lehra Majhar, and Dudhai Majhar, which are reserved primarily for the sake of pasturage and yield no revenue except from grazing and thatching grass.

“ Working Circle IV is the Doma Khand block in the north-east of the district which, except for two small patches of sal forest, consists of miscellaneous forest and grass land. Most of this area is leased until 1919 and the rest is merely being protected for the time being, and yields practically no revenue.

RANGES.

“ The 1914 working plan also introduced a redistribution of the forests into Ranges which now number seven instead of three as before. The Ranges, each of which is in the charge of a Ranger or Deputy Ranger with headquarters at the place which gives its name to the Range, are as follows:—

“ 1. Tilkonia Range.—Ramgarh Tilkonia, Bhelampur, and Banki forests.

“ 2. Campierganj Range.—Bhari Babban, Bhari Baisi, Chhitahi, and West Lehra forests.

“ 3. Pakri Range (Dudhai forest and Dudhai Majhar.

“ 4. Lachhimpur Range.—East Lehra forest and East Lehra Majhar).

"5. Chouk Sakhui Range, with headquarters at Chouk, Western part of Nagwa and Sonari forest.

"6. Madhaulia Range—Eastern part of Nagwa and Sonari forests and Tenduana.

"7. Nichlaul Range—Domakhand and Gopalganj. There are no rights of any kind in the forests. Grazing is permitted on payment over an area of 35,200 acres, the total number of cattle that were grazed in 1915-16 being 33,330 excluding a large number which graze in the Domakhand leased forest and are not enumerated.

"REVENUE.

"The chief product of the forests is sal in the shape of timber and fuel. The demand is mainly for metre gauge and light railway sleepers, for building-timber, including poles of two to three and a half ft. in girth which are in strong demand, and firewood, much of which is used in the sugar factories of the district.

"As the population is growing and the Zamindari forests disappearing, the local demand for forest produce from the Government forests is always on the increase. At the same time the yield from the Government forests is much greater now than in former years and a quantity of produce is exported to Dinapore, Chapra, Benares, Lucknow, Cawnpore, and other towns in the east of the United Provinces and in Bihar. The sale of thatching grass brings in about Rs. 45,000 per annum, while grazing fees, fish, bamboos, and wild fruits help appreciably to swell the total revenue. The financial results of the forest management have improved regularly and rapidly from the time when Government was in doubt whether the Gorakhpur forests were worth preserving to the present day when they are almost the best paying forests in India; the gross revenue having risen steadily from Rs. 5,235 in 1862-3 to Rs. 3,34,269 in 1914-15 and the gross annual expenditure having increased from Rs. 2,660 to Rs. 57,042 only during the same period. The financial prospects for the future are very promising, as the demand is always going up and most parts of the forests are now well stocked with timber the quality of which will steadily improve with the removal of the trees which were damaged before the forests were brought under proper management. The great need is for better railway communications for

the forests in the north of the district. The surveys for three new branch lines have already been made and work would have been started on them by now but for the war." *Page 25, lines 5 to 7, for "The only, Gorakhpur" read "A considerable area of sal belonging to the Mian Sahib remains intact at Kusmahi, nine miles east of Gorakhpur. There is good sal in Jungle Farzand Ali belonging to the Majhauri Estate, which with another jungle village (Hathi Hathsar) has been leased to the Forest department. There are also somewhat extensive private sal forests south and west of the Banki Government forest, on which however considerable inroads have recently been made. The most extensive area of private forest is on the east side of the Great Gandak, where five villages belonging to the Bettia Estate are almost entirely forest. Their management has recently been made over to the Bettia Estate Forest Officer whose headquarters are at Bagaha in the Champaran district."*

Page 25, lines 20 to 31, *delete* "Since the . . . much importance" and *substitute* "Since the Settlement there has been a considerable decrease, the area occupied by groves in 1908-09 being only 63,285 acres. Old groves were destroyed and converted to agricultural purposes. The chief reason for this undoubtedly was the demand on the part of sugar-refiners for wood as fuel. The wholesale destruction of all groves in the south-east of the district was only prevented by the sale of sal wood from the reserved forests, which was found to be better than mango wood as fuel. But as the blocks where the thinning out and replanting of trees took place gradually receded from the railway, the cost of sal wood steadily increased owing to higher cartage and as the demand for fuel continued to increase, there was a steady decline in the grove area of the district. There are however signs that this process has now stopped. Coal is being increasingly used as fuel, especially at Rampur Karkhana, while the extension of the railway has brought many blocks of the reserved forest nearer to the railway line. Accordingly, there has been a marked growth in the number of new plantations within the last few years. The average area covered by groves during the five years ending 1912-13 is 64,082 acres, while the actual figure for 1912-13 is 64,918 acres.

"The only tahsil which shows a steady decrease in the grove

area during the last five years is Bansgaon. In spite of this decrease however the proportion of groves is still highest in Bansgaon, being 3·65 per cent. of the total area of the tahsil, as compared with a percentage of 2·21 for the district generally."

Page 26, line 18, "*alter* Rs. "2" to "Rs. 2-4-0 including four annas royalty."

Page 26, line 20 *alter* Rs. 7-0-0 to Rs. 8-2-0.

„ 27, „ 4 *alter* "four annas" to "Re. 1-12-0."

„ 27, lines 6 to 8, *delete* "bamboos of all . . . per hundred" and *substitute*—

"Bamboos of all sizes have gone up in price considerably during the last few years, the larger kinds which were sold for Rs. 20 per hundred not so very long ago now fetch as much as Rs. 50, while the smaller kinds have also gone up from Rs. 12 or Rs. 15 to Rs. 20 or Rs. 25 per hundred."

Page 28, lines 1-4, *delete* : "During the . . . Rs. 139" and *substitute*—

"For the five years ending 1915 the average number of reported deaths from snake-bite was 526 annually, as compared with 489 for the preceding five years."

Page 29, line 13, *alter* 9,916 to 2598.

4141, to 956.

Page 29, lines 32 to 35 *for* "and no attempts bull," *read*—

"Little has been done towards improving the local breed, reproduction being as a rule left to the agency of the ownerless and half-wild bull. But about a dozen Kheri bulls have been imported from the Government cattle farm in that district by various co-operative credit societies, mostly in the neighbourhood of Kassia, and one or two of the larger zamindars have imported such bulls, which are deemed best suited to improve the breed."

Page 33, lines 24, 612, *after* 865 *insert*—

"The census of 1914-15 shows that the increase still

continues. The number of plough cattle is 704,879, in addition to 5,731 male buffaloes.

"The number of ploughs has however also increased to 321,668, so that the average for each plough has decreased to 2·19. The cows number 447,695 and the cow-buffaloes 135,415 both showing a substantial increase; the total of young stock has however decreased to 548,097."

Page 31, line 5, *alter* 13,289 to 14,831.

„ 31, lines 13 to 20, *delete* "small as . . . overloaded;" and *substitute*—

"In spite of this, within the last five years the number of ponies has increased by 12·3 per cent.; for in 1909 they only numbered 13,209. This is probably connected with the growth in material prosperity of the district, many even of the smaller zamindars having taken to riding. At the same time, with the improvement of roads ponies as pack animals are being gradually replaced by carts, which have increased to 38,486, this substitution representing an immense gain in efficiency."

NOTE ON CATTLE DISEASE.

Page 32, lines 12 to 18, *delete* "at the first export" and *insert*—

"There are dispensaries at both Kasia and Deoria and a regular cattle hospital at Gorakhpur, which was taken over by the

District Board in 1915. It is hoped before long to have nine veterinary assistants for the district, one in each of the six tahsils on peripatetic work and the other three in charge of hospitals at Gorakhpur, Kassia, and Deoria."

Page 33, line 18, *after* "50" *add* "and the air is always damp; heavy dews continuing through practically the whole of the cold weather."

RAINFALL.

Page 33, line 37, *after* "more than 46·38" *insert*—

"For the 10 years ending 1915, the rainfall was somewhat less, averaging 49·18 inches for the district; Mahraganj as usual received the largest amount, 55·03 inches annually, while the fall in Deoria averaged only 44·73."

Page 34, line 5, *after* "as a whole 63·75" *insert*—

"Again in 1910 Mahrajganj received 81·83 inches, while the average for the district was 65·16. The floods in this year caused considerable damage. In 1915 again the rainfall was heavy, the average for the district being 63·71 inches."

HEALTH.

Page 35, *delete* lines 3 to 5, viz., "subsequent years . . . 36·88 per mille" and instead *insert* after line 2 the following:—

"The subsequent decade 1901—10 shows a slight improvement, for while the death-rate rose to 28·90 per thousand, the births also rose to 38·80. There was a remarkable rise in the birth-rate from 36·62 in 1908 to 46·96 in 1909; and though this high figure has not been kept up the average birth-rate for the five years in 1909—13 is 45·08. The ravages of plague and cholera account for the rise in the death-rate; they were particularly severe in 1910, when the death-rate rose to 35·10. The following year was almost as bad, the death-rate being 34·31, but since then it has again fallen and the average for 1912-13 is 28·65."

FEVERS.

Page 35, line 21, *after* "deaths" *insert* "recorded as."

„ 35, „ 36 to page 36, line 2 *delete* "succeeding period . . . total mortality" and *substitute*—

"The succeeding decade 1901—10 has been characterised by many violent epidemics of fever which have accounted on an average for 60,000 deaths yearly, or 70·45 per cent. of the total

mortality. Nor have the following years shown any sign of improvement; in 1911 as many as 74,319 cases of deaths from fever being recorded."

CHOLERA.

Page 36, line 21, *delete* the sentence "since 1901 . . . in 1906" and *substitute* "since 1901 matters have improved a little; the average for the 10 years 1901—10 is 4,399 deaths, or 5·16 per cent. of the total deaths. In 1906 there was a widespread outbreak introduced from Nepal and there were serious epidemics again in 1910 and 1913. It may be noticed that the old objection to the permanganating of wells is slowly disappearing, but no real diminution of cholera epidemics is to be looked for until the custom of throwing corpses of persons who have died of cholera into water is stopped."

SMALL-POX.

Page 37, line 9, *delete* "The figures . . . numbered 3,166" and *insert*—

"The figures of succeeding years have shown considerable improvement; the average for the decade 1901—10 was 1,386 but this was in large measure due to the severe attacks of 1907 and 1908; in the latter year the deaths numbered 7,985. The average for the four years 1911-14 is only 96."

Page 37, line 14, *delete* the word "Primary."

PLAQUE.

Page 37, *delete* the whole paragraph and *substitute*—

“Plague first made its appearance in 1902, when 3,677 persons were carried off by the disease. Since that time it has been steadily present with varying intensity, the annual average for the nine years 1902—1910 being 6,290. This high figure shows signs of increase rather than decrease; for from 1911 to 1914 the disease was responsible for 10,697 deaths annually. Plague is worst in the south of the district; so far it has not penetrated the Mahrajganj tahsil or the north of Padrauna. The city has suffered severely and is now almost deserted when plague attacks any of the *muhallas*. Few effective measures have been taken to eradicate the disease, for evacuation has seldom been complete and disinfection has never been popular.

“The policy of killing rats was in vogue from 1907 to 1910, but was then given up, as it was not found practicable. At the end of 1913, fumigation was resorted to in several *muhallas* of the city, but there was considerable public opposition and only some 696 houses were actually fumigated. Besides, it was found impracticable to remove the grain bins or to get at the rats in the roofs and the large number of ruined houses was an additional difficulty.

“For these reasons the experiment met with but indifferent success and the mortality from plague in 1914 was as much as 12,865—a figure which was only surpassed in 1910, the figure for which year was 14,980. Inoculation was started in 1907, but up to the present time has made little headway. Evacuation is however resorted to with fair promptitude as far as is possible.”

Page 38, line 17, *after* “rivers” *insert* “though it is far more likely to be connected with the fact that the alluvium brought down by the Great Gandak and forming the ‘Ghat’ soil consists very largely of chalk, with the result that all water in that area is strongly impregnated with that material.”

HARVESTS.

Page 45, lines 3 to 15 *delete* "in the year . . . seasons" and *substitute*—

"For the 10 years ending 1907-08 the kharif averaged 1,507,374 acres and the rabi 1,195,983 acres, the ratio of the rabi to the kharif being 79·1. Since then the area under spring crops has increased more rapidly than that under autumn crops, the average for the last five years being 1,286,715 acres under the former and 1,574,066 acres under the latter, the ratio of the rabi to the kharif being '82 while in 1910-11 the rabi area was as high as 1,444,828 acres and the kharif area only 1,515,063 acres. The relative proportion varies greatly in different parts of the district, more than half the total kharif is to be found in the two tahsils of Maharajganj and Padrauna, though the rabi is more evenly distributed. In Padrauna the proportion of kharif to rabi is as 100 to 61, and an almost equally marked preponderance is to be found in Maharajganj, in spite of the fact that of recent years the increase in the rabi has been nearly double that in the kharif, in fact the proportion of autumn to spring crops in Maharajganj was '55 for the 10 years ending 1907-08 as compared with 64 for the five following years. In the Hata tahsil too the kharif covers decidedly the larger area, the rabi being '81 of the kharif, but in Deoria the difference is very slight, the ratio being '97, while in Gorakhpur and Bansgaon, and especially the latter, owing to the wide expanse of kachhar the rabi takes the leading price in all but

most exceptional reasons. It must however be noticed that of late years the proportion of rabi to kharif has decreased in both these tahsils the figures for the five years ending 1912-13 being 1·11 and 1·31 respectively, as compared with 1·14 and 1·33 for the proceeding decade."

Page 45, line 26.

DOUBLE CROPPING.

Alter "705,662" into "729,185."

„ "34·2" „ "33·9."

Page 46, line 4—

Alter "some 24" into "26·8."

Page 46, lines 16 to 24 *delete* "but since the . . . in the district" and *substitute*—

"RICE.

"Thereafter a remarkable expansion occurred and for the five years ending 1907-08 the average area under rice was no less than 955,236 acres, or 62 per cent. of the entire kharif, the area under this crop in 1906-07 being 1,028,251 acres. The next five years however show a slight decrease, the average area under rice being 931,975 acres or 59·2 per cent. of the kharif. The distribution of this crop is very uneven; in Deoria it constitutes 33·7 per cent. of the kharif of the tahsil as compared with 64·7 per cent. in Hata and 84 per cent. in Maharajganj, the latter containing two-fifths of the entire rice land in the district. The decline of the last five years is most apparent in Padrauna and Deoria, where the proportions have decreased from 45·6 and 37·3 per cent. to 41·2 and 33·7 per cent. respectively."

Page 47, lines 7 to 14 *delete* "The present . . . total kharif," and *substitute*—

"KODON.

"It is generally sown either in combination with rice or with arhar; the statistics do not discriminate between these crops; the kodon rice combination is generally passed off as rice, while the kodon-arhar mixture and kodon alone are shown together. The present average area of the latter is 269,294 acres or 17·1 per cent. of the kharif; in 1908-09 the area reached the surprising figure of 361,741 acres. For the five years ending 1907-08 the area sown with kodon alone is given as 162,878 acres; no separate

statistics are available for the kodon-arhar combination which was doubtless sometimes included in kodon and at others in arhar. Accordingly the gigantic increase shown in the area under kodon is accompanied by a decrease in both arhar and rice. But even allowing for a certain amount of confusion there can be no doubt the last few years have witnessed a substantial increase in the area sown with kodon and kodon-arhar. This increase is most marked in the Deoria tahsil; the average area five years ago was only 24,002 acres, while the present figure is 65,360 acres or 34·3 per cent. of the total kharif area of the tahsil. In Hata also the area covered by this crop has increased from 10,900 to 28,745 acres. In the Gorakhpur tahsil it covers 44,878 acres or 23·4 per cent. of the kharif; while the largest area is to be found in Padrauna, where it occupies 73,483 acres though here it only amounts to 19·4 per cent. of the total kharif for the tahsil."

Page 47, lines 20 to 27, *delete* "Maize is now . . . of the east" and *substitute*—

" MAIZE.

"Maize is now a very important staple, at least in some parts of the district, the present average being 116,340 acres, or 7·39 per cent. of the kharif. More than half of this amount comes from the Padrauna tahsil, where maize occupies 15·6 per cent. of the area under autumn crops. The present area under maize is double the figures recorded in 1888, but the last 10 years show practically no increase in this area; in fact the area under maize in Padrauna has decreased from 61,311 acres annually for the five years ending 1901-03 to 58,967 acres at the present time. In Gorakhpur and Maharajganj it is however increasingly popular, though its real home is still in the higher Bhat lands of the east."

Page 47, line 34 to page 48, line 4, *delete* "A still . . . near future" and *substitute*—

SUGARCANE.

"A still more valuable product is sugarcane which covers on an average 106,444 acres, or 6·76 per cent. of the kharif and, like maize, gives excellent results in the Bhat soil. This fact accounts for its predominance in the Padrauna tahsil where

45,486 acres were sown on an average annually during the last five years, the corresponding figure for the 10 years previous being only 30,735. The bulk of the remainder is to be found in Hata, Deoria, and Maharajganj, but while the area in Deoria has of late decreased that in Maharajganj has shown a large extension; it has increased there from 5,478 acres annually for the five years ending 1902-03 to 7,112 acres in the next quinquennial period and 12,608 acre at the present time, the area having been thus more than doubled in 10 years."

Page 48, end of line 10, mark the word "area" with a star and give the following footnote in small type:—

"NOTE.—The actual village in which the data forming the basis of this note were obtained was Sonbarsa, near Hata; but the results are probably widely applicable. The maund in use (referred to as 'md.V') is one of 28 gandas of rupees or 112 tolas Government weight. The various operatives concerned in the work are—

"The Pakwaha, he who superintends the boiling of the juice, and keeps up the fire.

"The Murwaha, he who puts the cane into the mill.

"The Katarwaha, he who drives the bullocks, and, in the case of a wooden sugar mill, sits on the shaft thereof.

"The payments made by a cultivator who uses his own bullocks to work the mill are as follows:—

"To the carpenter who makes and repairs the mill; to the Pakwaha and to the murwaha, each one maund (V) of gur after every 24 retained by the cultivator, the Pakwaha and Murwaha also each receive Re. 1 in cash. To the Katarwaha Rs. 2 in cash per month with food and some clothes, or say equivalent to annas 2 per day. For cutting, stripping, and bringing to the mill enough cane for one mill:—

"Four men at about three Gorakhpuri pice per day in cash with parched rice, cane-juice, etc., reckoned at about equivalent to six annas Government coin per day. The boiling pan (karah) used to cost about Rs. 6 before the war, but was then (1917) reckoned to cost about Rs. 10. It lasts eight or 10 seasons. In addition to these charges the zamindar levies a charge of from Re. 1 to Rs. 2-8 per mill; this is known as kolhuwana. Thus as the

total expenses in producing 24 mds. V of gur from his own cane we have, (the rate of production being approximately one maund V per mill per day).

				Gur.	Cash.
					Rs. a.
Carpenter 1 Md. V	..
Pakwaha 1	1 0
Murwaha 1	1 0
Katarwaha	3 6
Cutting and stripping	10 2
Kolhuwaha, karah, and miscellaneous (say)	0 8
Total				.. 3 mds. V	16 0

or, converting to Government weight, we have as the cost to the cultivator of producing $24 \times 112/80$ standard maunds of gur the value of $3 \times 112/80$ maund + Rs. 16. If now we put A as the price in rupees of 1 maund (Government) of gur we have at the cost of producing that one maund in rupees : $\frac{21A + 80}{168}$ (Details of calculation are—cost is—

$\frac{3A \times 112/80 + 16}{24 \times 112/80} = \frac{21A/5 + 16}{24 \times 7/8} = \frac{21A + 80}{168}$. In this village it is stated that from 8 to 10 maunds of cane are required to produce a maund of gur. If we take the higher figure the value of 10 maunds of cane is the price of the gur less the cost of production or A $\frac{(21A + 80)}{168}$ or $\frac{(47A - 80)}{168}$ rupees. Thus the cane is worth to the cultivator $\frac{14 \cdot 7A - 8}{168}$ rupees per maund or in annas $(7A/5 - \cdot 76)$ or very nearly $7A/5$ annas less 9 pies.

“ If the cultivator has to hire bullocks to work the mill the system is precisely similar save that in this case the carpenter, pakwaha, and murwaha are said to be to receive the same payments after every 20 mds. V and that for the bullocks 4 mds. V are paid after every 20 mds. V. retained by the cultivator; the payment for the bullocks however includes the pay of the katarwaha. Allowing the same amounts for cutting, stripping, and other items as in the former case we have as the total cost of producing 20 mds. V the value of 7 mds. V of gur plus Rs. 12-10, whence the cost to the cultivator of 1 md. (Government) of gur is—

$\frac{7A + 112/80 + 12 \cdot 625}{20 \times 112/80}$ or $\frac{49A + 63 \cdot 125}{140}$ and the value of 10 mds. of

cane is $\frac{A-49A+63.125}{140}$ rupees or $\frac{91A-83.125}{140}$ rupees, whence the value of a maund of cane is in annas $1.04A-.72$ or very nearly 1.04 annas less 9 pies.

“ Comparing the two we thus have—

Prices of gur in rupees per md. (Government).		Value of cane to cultivator in annas per md. (Government).	
		Using his own bullocks.	Hiring bullocks.
A	..	(1.4A-.76) a. p.	(1.04A-.72) a. p.
2.5	..	2.74 or 2 9	1.88 or 1 10
3.0	..	3.44 or 3 5	2.40 or 2 5
3.5	..	4.14 or 4 2	2.92 or 2 11
4.0	..	4.84 or 4 10	3.44 or 3 5
4.5	..	5.54 or 5 7	3.96 or 4 0

“ As regards the comparative merits of the wooden and metal kolhus it is reckoned that the latter express from $6\frac{1}{4}$ to $12\frac{1}{2}$ per cent. more juice but that no more gur can be made in a day; merely less cane is used to make it. Thus in using a metal kolhu it is fairer to estimate about eight and a half mds. of cane per md. of gur and calculation in precisely similar fashion we have the following sets of values as the value of the cane to the cultivator :—

Value of gur in rupees per md. (Government).		Value in annas per md. (Government) of cane to cultivator.	
		Using own bullocks.	Hiring bullocks.
A	..	(1.65A-.9) a. p.	(1.22A-.85) a. p.
2.5	..	3.22 or 3 3	2.2 or 2 2
3.0	..	4.05 or 4 1	2.81 or 2 10
3.5	..	4.87 or 4 10	3.42 or 3 5
4.0	..	5.7 or 5 8	4.03 or 4 0
4.5	..	6.52 or 6 6	4.64 or 4 8

As already stated, the foregoing data are based on information obtained in Sonbarsa near Hata, and are of course not of

universal application; moreover, it is that they have been modified since they were obtained (in 1917). In some villages it would seem the pakwaha is paid more liberally, getting, for example, in addition to what has been above noted, another 10 seers of gur for every 28 bullocks, and a daily payment of two sugarcanes and a quarter seer of gur; or occasionally in lieu of the additional 10 seers of gur a cash payment of twelve annas. The details will vary from village to village. Similarly, also the yield of gur per maund of cane will vary considerably and that given as current in Sonbarsa would appear from later information to be probably above the average which is nearer 10 or 12 mds. of cane per maund of gur. Expert opinion as regards the comparative merits of the wooden and iron kolhus points to the probability that the iron kolhu does not extract a greater percentage of juice, but merely enables a greater quantity of cane to be crushed, and that is the explanation of the greater production of gur per day when it is used."

Page 48, lines 13 and 14, *delete* "By itself it . . . more frequently" and *substitute*—"Usually."

ARHAR.

Page 48, lines 20 to 25 *delete* "The average . . . and Bansgaon."

Page 48, line 26 *alter* "The crop" to "It."

„ 48, lines 36 to 38 *delete* "On the whole . . . this crop" and *substitute*—

"The mixture of kodon and arhar has already been dealt with, while the combination of arhar and rice is invariably entered as rice only. The figures given for arhar alone show a considerable decrease within the last few years. Thus the average area for the five years ending 1912-13 is only 10,327 acres, or .66 per cent. of the entire kharif, the corresponding figures for the preceding quinquennial period being 28,414 acres, or 1.84 per cent. and those for the five years ending 1902-03 being 44,333 acres, or 3 per cent. It is however clear that the figures for the period before 1907-08 are not to be relied on, as a considerable proportion of the kodon-arhar mixture was doubtless passed off as arhar alone. More than half the pure arhar comes from Mahrajganj,

the rest being grown principally in Hata, Padrauna, and Deoria ; the almost total absence of pure arhar in the kachhar tracts of Bansgaon and Gorakhpur, according to these figures is significant. It may safely be asserted that the area under arhar crops, alone and mixed, so far from having decreased, has substantially increased of late years."

Page 49, line 16 *alter* "ten" to "fifteen."

„ 49 „ 17 „ 1906-07 to 1912-13.

„ 49 „ 18 „ 8,670 to 7,820.

„ 49 „ 19 „ "Saleempur" *insert* commas and *add*—
"74·2 per cent. of the crop being cultivated in the former and 20 per cent. in the latter tahsil."

Page 49 line, *add* 33 after "position." The cutting off of the supply of synthetic indigo during the war and consequent great rise in the price of indigo caused a considerable revival of the cultivation of indigo. Whether this is to be more than temporary improvement depends largely on how far the growth of the plant and the process of manufacture can be improved."

OTHER CROPS.

Page 49, line 36, *alter* 35,271 to 27,875.

„ 49, „ 37 to page 50, line 8, *delete*—

"Mention may . . . Padrauna " and *substitute* "Next in importance is the oil seed known as Til of which nearly half is to be found in Mahrajganj. The remaining crops include the pulses called Urd and Mung, which are most popular in the Gorakhpur tahsil ; Juar (which is here invariably called Bajra) grown chiefly in Gorakhpur and Deoria, the well-known Bajra of other districts, which requires a light soil and little moisture, being seldom seen in these parts ; Juar grown for fodder in Hata ; garden and miscellaneous produce in Deoria and Padrauna. There are 1,423 acres under hemp and sanai, nearly half being in Padrauna."

Page 50, line 14—page 51, line 26, *delete*—

"the paragraph on wheat and barley " and *substitute*—

CEREALS.

"Among the rabi crops the foremost place is taken by the cereals, the total area occupied by wheat and barley, both alone and in combination, during the last five years being 655,253

acres. At the seventh settlement, about 1865, the total area was 546,227 acres, the figure rising to 578,008 acres in 1891 and to 674,544 at the last settlement, the increase being attributed mainly to the reclamation of the land from forests. The last year however would seem to have been an exceptionally favourable rabi season, for between 1878 and 1889 the average area devoted to cereals was only 552,725 acres. Since then the total area under cereals has steadily increased, though it has not kept pace with the expansion of the rest of the rabi crops. Thus for the five years ending 1902-03 the proportion of cereals was 52·8 per cent. of the entire rabi and for the next quinquennial period it was 52 per cent., the present figure being only 50·9 per cent. This is doubtless due to the increase in the popularity of various miscellaneous crops. Mahrajganj is the only tahsil in which the area under cereals shows a considerable increase.

“GUJAI.

“Among cereals by far the largest area is occupied by the mixture of wheat and barley known as Gujai, averaging 304,266 acres. If the old returns can be accepted, there would appear to have been an immense increase in the Gujai area, for at last settlement the total was only 211,875 acres, while, for the five years ending 1907-08 the average area under Gujai was 309,433 acres, or 25·5 per cent. of the spring harvest, in spite of the fact that the last year showed an abnormally small area under Gujai. As the crop at present constitutes only 23·7 per cent. of the rabi, it is clear there has been a considerable decrease in the last five years. In Maharajgunj it constitutes only 16·3 per cent. of the rabi crop of the tahsil; in Bansgaon, on the other hand Gujai covers 58,994 acres, or 31·7 per cent. of the spring harvest of the tahsil, while in Deoria the corresponding figures are no less than 66,644 acres and 36·1 per cent.

“BARLEY.

“Next to Gujai comes barley, which occupies an average area of 191,134 acres, or 14·8 per cent. of the entire rabi, the highest proportion being 17·7 per cent. in Deoria, followed by 16·2 per cent. in the Gorakhpur tahsil. Of recent years the area occupied by pure barley seems to have decreased; the returns of the last settlement showed 246,795 acres under this crop;

this figure was doubtless incorrect, though in the year 1907-08 we again find barley covering an area of 246,894 acres, and exceeding even the Gujai area for that year. Apart, however, from these exceptions, only 10 years ago barley constituted 16·1 per cent. of the entire rabi. The decline is most marked in the Padrauna tahsil, where for the five years ending 1902-03 the average area covered by barley was 54,775 acres as compared with 35,064 acres at the present time.

"There can be no doubt that barley is being gradually replaced by wheat in this tahsil. In the Gorakhpur tahsil, on the other hand, the reverse tendency is noticeable, the area under barley actually showing an appreciable increase; while Maharajganj shows an increase in both barley and wheat.

" WHEAT.

"The area under wheat alone has increased within the last few years. The present average area is 159,853 acres, or 12·4 per cent. of the spring harvest, as compared with 139,726 acres or 11·5 per cent. only five years ago. In 1878 the recorded area under wheat was 135,574 acres; at the last settlement this had risen to 215,837 acres; as the highest wheat area within recent years is only 175,713 acres, it seems pretty certain the former figures are not to be relied on; confusion was doubtless caused by the extensive practice of growing mixed rabi crops. The proportion of wheat is highest in the Padrauna tahsil, where it amounts to 18·1 per cent., followed by the Gorakhpur tahsil with 14·8 per cent. In Deoria the area under wheat alone is practically negligible, Gujai being the popular crop. Apart from this, wheat is pretty evenly distributed, the wheat of pargana Hasanpur Maghur and of Unaula being specially celebrated. The hard white wheats do not flourish in this district, the best results being obtained with the soft red varieties, for which there is no great demand in the export trade."

" PEAS.

Page 51, lines 31 to 34, *delete* "altogether . . . a figure" and *substitute*—

"Altogether it averages 237,954 acres, or 18·4 per cent. of the harvest, the highest proportion being 28·5 per cent. in the

Deoria tahsil, followed closely by 28·2 per cent. in Hata.”

Page 51, last line, at end of paragraph *insert*—

“In 1907-08 there was a sudden fall to 108,813 acres, but succeeding years were more favourable, and in 1911-12 the crop occupied an area of as much as 333,633 acres. Peas form with rice the staple food of the mass of the population.”

GRAM.

Page 52, lines 2 to 10 *delete* “sown alone . . . gram sown alone” and *substitute*—

“Sown alone it averages 109,020 acres, or 8·46 per cent. of the rabi; 44 per cent. of this is to be found in the Maharajganj tahsil, where gram is generally grown in the clay soils after the rice harvest; it is rarely to be seen in the Bhat tracts of Padrauna and Deoria, but elsewhere it is fairly evenly distributed. The mixture of gram and barley, sometimes called Bijra, averages nearly 84,700 acres, or 6·58 per cent. of the total rabi area; this mixture is becoming increasingly popular in the Gorakhpur and Bansgaon tahsils, a mixture of gram and wheat is but rarely seen in this district.”

OIL SEEDS.

Page 52, line 17 *alter* 89,985 to 96,722.

„ 52 „ 19 „ 7·1 to 7·5 *alter* 43,000 to 35,088.

„ 52 „ 22 to 26, *delete* “The total . . . cultivation” and *substitute*—

“In fact it is largely from the proceeds of these crops that the ordinary cultivator hopes to pay his debts or buy his cattle, and the actual area under oil seeds must be considerably greater than is indicated by these statistics.

“At the same time the area covered by linseed shows abnormal variations, thus from 1877 to 1889 the average was 107,831 but in the year of the settlement there was a sudden rise to 182,245 acres. Again the average for the five years ending 1902-03 was 118,194 acres, while the area for 1903-04 was 199,016 acres, which decreased to 20,102 acres in 1907-08; by 1911-12 the area had again risen to 171,808 acres, but the very next year shows an extraordinary decrease to 45,520 acres only. These sudden variations are difficult to understand.”

POPPY.

Page 53, lines 3 to 7 after "1899" *insert* semi-colon instead of comma; *delete* "but the average . . . extensive," and *substitute* "the average for the 10 years ending 1907-08 showed a slight rise to 16,035 acres, but the average of the last five years has been only 7,055 acres, or 55 per cent. of the rabi. The only part of the district in which poppy cultivation can be described as even moderately extensive is the Deoria tahsil, where the crop covers 3,155 acres, the bulk of the remainder being in the Bansgaon and Padrauna tahsils."

OTHER CROPS.

Page 53, line 17 to 27, *delete* "The largest area . . . insignificant quantities" and *substitute*—

"The largest area, 39,126 acres, is taken up by masur or lentils, over half being found in Padrauna, and nearly one quarter in Mahrajganj. Of the miscellaneous food crops, Latri and other vetches cover an area of 9,284 acres, being practically confined to Mahrajganj and Padrauna; and Boro or winter rice averages 7,407 acres, over 40 per cent. of which is to be found in the Gorakhpur tahsil, while the area covered by the crop in Padrauna is negligible. Padrauna however holds a practical monopoly of the spices and condiments, mainly turmeric and chillies, grown during this season. Vegetables and other garden crops found mainly in Padrauna and Gorakhpur. Tobacco at present averages only 461 acres as compared with some 3,000 acres for the five years ending 1907-08. The decrease is most marked in the Mahrajganj and Gorakhpur tahsils, less than 10 acres being now found in the former. The largest area, 183 acres, or nearly 40 per cent. of the crop, is to be found in the Bansgaon tahsil.

ZAID CROPS.

Page 53, line last to page 54, line 6, *delete* "Of late . . . are sufficient," and *substitute* —

"On an average it covers some 15,000 acres, increasing in unfavourable seasons, for cultivators will only go to the labour and expense of irrigating a hot weather crop if their stores of grain are insufficient; thus during the scarcity of 1906-07 the area under Zaid crops rose as high as 26,714 acres."

Page 54, line 31 for "as a rule" *read* "in some parts."

IRRIGATION.

Page 55, line 27, *delete* " In the last . . . 3·2 per cent., (end of paragraph) " and *substitute*—

" In the five years ending 1912-13 the general average for the district was 664,258 acres, or 31·1 per cent. of the cultivated area, the Deoria tahsil coming first with 52·1 per cent., followed closely by Hata with 47·4 per cent. Bangsaon with 38·8, and Gorakhpur with 34·3 per cent. The lowest figures are 20·1 per cent. in Mahrajanj and 12·5 per cent. in Padrauna, whilst among individual parganas the irrigated area of Tilpur is 7·4 and that of Binayakpur 5·9 per cent. as compared with 6·6 and 3·2 per cent. respectively in the preceding quinquennial period."

" WELLS.

Page 56, line 6 *delete* " ending with . . . 52·6 per cent." and *substitute*—

" Ending with 1912-13 the figure was 349,664 acres, or 52·6 per cent." etc.

Page 65, line 3 *after* " construction of the " *read*, " Molony band, a "

Page 65, after line 15 *insert* new paragraph with marginal heading " 1907-08 " :—

" 1907-08.

" The scarcity of 1907-08 was not so serious in Gorakhpur as

it was in other parts of the province. An unexpected break in the rains in the fourth week of June caused considerable anxiety, but the situation was saved by a heavy downpour in July. The total rainfall was however much below the normal, being 23·77 inches against an average of 44·84 inches, while its uneven distribution combined with its abrupt stoppage in September practically destroyed the late rice and caused considerable damage to the early variety also. Advances amounting to Rs. 82,000 were distributed for the purchase of cattle and seed for rabi sowings and for the digging of kachha wells for irrigation purposes. Suspensions and remissions of revenue were also granted to the extent of Rs. 21,400. Thanks to these prompt measures, the people were able to push on with the rabi sowings as soon as the temperature had come down to germination point at the end of October. November and December were rainless, but the subsequent rainfall in the early months of 1908 materially benefited the late-sown rabi; and the suspension of the second instalment of the revenue was less than Rs. 5,000. Owing to high prices, there was considerable distress, but work was plentiful and no test works were opened. Generally speaking, the monsoon of 1907 resembled that of 1896, but the distress was much less acute, partly owing to a few opportune showers in September, and partly to the better organization and preparedness of the district staff and the prompt measures taken."

PRICES.

Page 66, line 35—page 67, line 10, *delete* " subsequent seasons . . . year to 1905 " and *substitute*—

"Subsequent seasons were unfavourable and prices rose rapidly, till in 1907-08 they exceeded scarcity rates. Thanks however to the excellent harvests of 1908 and following years, prices again fell, reaching their lowest level in 1911, but even so they never reached the 'normal' rates. Since then they have risen very sharply and in 1915 they were higher than ever before. Doubtless a return to normal conditions will entail a fall in prices, but it is doubtful if the recovery will ever be complete. The prices fixed as normal for the district some years ago seem to have become obsolete and are not likely in the future to be

anything but abnormal. The average for the 10 years ending 1915 is 9·46 seers of rice, 10·96 seers of wheat, 15·71 of barley, 10·787 of arhar, and 13·96 of gram to the rupee. Thus in the last 10 years prices have risen by 21 per cent. or, on the whole in the past 55 years, they have risen 23 per cent. from 1861 to 1885, 46 per cent. from the former year to 1905, and 57 per cent. from 1861 to 1915."

WAGES.

Page 67, line 14 to page 68, line 9, *delete* the whole paragraph on wages and *substitute* —

" Throughout the district, wages rule much lower than those prevailing in the western parts of the United Provinces, the scale being that of the eastern districts generally ; in the last five years however they have risen very sharply. Early records of wages are not available, but it would appear that from 1858 to 1868 the remuneration of field labourers remained at the same level, varying from six to eight pice daily, although cash wages were relatively rare. During the next decade the higher rate generally prevailed, though from 1878 to 1908 the district average was still from six to eight pice ; the present average is however from eight to ten pice, and cash remuneration takes the form of the so-called " Gorakhpuri pice " and amounts from 10 to 15 of these coins daily, the equivalent in Government currency being two and three annas. In practice however payment is usually made partly in cash and partly in kind ; when paid wholly in kind, it varies from two to three seers. The rate of course depends on the locality and the nature of the work performed ; wages are generally higher in the north, the average being three annas a day, for labour is less abundant there. Digging and irrigation with the large wooden shovel used for distributing the water are paid more highly than weeding and water drawing. During harvest time the labourer often gets from three annas six pies to four annas a day, mostly in kind ; ordinarily it is every sixteenth sheaf, usually the largest and best being chosen. The scale is of course lower for the regular retainers of the zamindar, who gives them constant employment throughout the year and supplements the cash remuneration or two annas per day with various extras, such as a daily dole of grain, a blanket in the cold

weather or a few maunds of gram at harvest ; five years ago they were content with one anna a day, but now they are scarce even at the higher rate.

“The ordinary ploughman now demands not only Rs. 2 a month in cash, but also a plot of land a couple of bighas in extent free of rent. This reflects a general tendency towards greater independency and social progress, the labourer wishing to become a cultivator. The rise in wages is not confined to the unskilled labourer ; even in rural tracts the wages of the carpenter, the blacksmith, and the mason have risen from three annas to five annas per day, while in the towns they usually get from six to eight annas daily. A similar rise is to be noticed in the case of the household servant ; for instance, in 1907 the average monthly pay of a sweeper was Rs. 3 and a syce Rs. 5 ; these have now increased to Rs. 5 and Rs. 7 respectively. The foremost reason for this increase is of course the rise in prices, which has already been noticed, culminating in the scarcity of 1907-08. Before this wages had been unduly low and the scarcity brought about a long-delayed and necessary change by bringing matters to a head and forcing up wages, and there is little likelihood of their ever going down again to their former level. The increase of emigration owing to the higher wages obtainable in Bengal and elsewhere, the ravages of plague and increased facilities of transport have also tended to increase wages in this district, and so has the greater demand for labourers due to the requirements of the railway workshops and the increase in the number of sugar factories. A further rise in wages during the next decade is to be expected.”

Page 68, line 19 for “are” read “were,” page 69, line 11 to page 70, line 8. Delete from—“Now the . . .” to “a gon,” and substitute—

“The basis of the weights is the ganda (properly a handful, but usually interpreted as meaning a set of four) of Gorakhpuri pice. A varying number, whole or fractional, of gandas was taken to form a local seer (which is more often than not different for different commodities also). Apart from the fact that when now the weight of these pice is by no means constant, as they have ceased to be coined, the supply of full weight ones is very

short and short weight pice are therefore used; this is apparently sometimes remedied by adding more pice to make the weight up to that of the original seer, than that increased number is used as the basis of a new seer and so on. On top of this system the 180-grain rupee has come, and as a result seers of various numbers of gandas or rupees have come into use, the rupee being by some regarded as equal to the pice in weight and by others not so, the usual ratio being apparently seven pice equal to five rupees. The result is the utmost confusion. Expressed in gandas the seers are almost innumerable, while when converted into terms of standard tolas each seer develops into several more according to the ratio assumed as existing between the gandas of pice and rupees.

"Matters are further complicated by the use of other standards which may not unfairly be said to be intermediate between measures of capacity and of weight. These are as complicated as the measures of weight just described, and are in fact based more or less directly thereon, the sei or sayee being supposed to be a measure that would contain a local seer of grain, usually rice. The variations of the sei are therefore as manifold as those of the local seer. In addition there is a measure known as rajia, which appears to be sometimes merely an alternative name for the sei, and at others a separate measure equal to $1\frac{1}{2}$ sei."

Page 70, line 23 *after* "closely" *insert*—

"Much confusion in local land measures was caused by the custom of enhancing rents by decreasing the length of the lathas whereby the bigha was measured."

Page 70, line 29. *Insert as a new paragraph*—

"At the end of this chapter will be found a complete list of the various weights and measures reported to the weights and measures committee of 1913-14 as in use in the district; to whose report (Report, pages 33 and 36, and appendices, pages 41 to 43, 63 and 64, 77 and 78, 86, 91, and 94) reference should be made for further information on the extremely complicated series of weights and measures in use in the district."

Page 71, lines 25 to 27 *after* "distributed" *insert* a full-stop, *delete* "and so far . . . institution" and *substitute*—

"Since then considerable progress has been made, the

working capital rising from Rs. 34,961 in 1906-07 to Rs. 1,28,057 in 1907-08 and Rs. 2,81,041 in 1914-15.

“The number of affiliated societies and of members however shows fluctuations. The number of societies once rose as high as 350, but owing to a change in the policy of the Co-operative Department all affiliated societies had to be re-organised into independent units. This work is now nearly complete, and there are 156 ‘independent’ societies, excluding 42 affiliated societies of the old type which will also shortly be re-organised. Several unsatisfactory societies have been closed and efforts are being made to open others in their place. The stability of the bank lies in the fact that it has now accumulated a strong Reserve Fund amounting to Rs. 24,000, a bad and doubtful debt fund amounting to Rs. 7,000 both of which are invested in Government of India war loan and G. P. notes.

“The share capital is Rs. 52,765-2-0, the bank’s own capital thus forming nearly one-third of the working capital.

“The bank has now ceased entirely to deal with individuals and loans are only given to registered co-operative societies affiliated to the bank.

“Each registered society has to take a share of Rs. 50 for a credit of Rs. 200 which further strengthens the financial position of the bank. The staff consists of Manager, Assistant Manager, and three District Inspectors to exercise efficient supervision over the constituent societies.

“Besides the local staff, the bank and its constituent societies are very closely supervised and controlled by the Government staff and are annually subjected to a statutory audit which is carried out under orders of the Registrar of Co-operative Societies by men empowered by him.

“The work of the bank is conducted by a Board of Directors and a working committee, the District Officer being the ex-officio Chairman of the Board.”

Page 72, line 7, *after* “various banks” *insert*—

“Since then considerable progress has been made and the present (1915) working capital amounts to Rs. 2,48,390-6-10, besides, there is a reserve fund of Rs. 32,924-8-2 in G. P. notes and 4 terminable war loans. The share capital consists of Rs. 31,292, of

which Rs. 17,722 are held by 125 individual shareholders, and the rest by registered co-operative societies working under the bank; unfortunately as much as Rs. 21,430 of the share capital is still unpaid."

Page 72, lines 14 to 19, *delete* "There are . . . was declared" and *substitute* :—

"There are at present 85 affiliated societies with 3,278 members. Several of the connected societies of both the Kasia and Gorakhpur Co-operative banks have purchased with the aid of the District Board Government (Kherigarh) bulls to improve the local cattle"

Page 72, lines 22 to 26 *delete* "One is . . . capital;" *insert* semicolon, and *substitute*—

"Local banking has of recent years received some very severe shocks on account of the practical failure of the Kayasth Trading and Banking Company and the formal failure of the Gorakhpur Bank, resulting in considerable losses to a large number of poor subscribers. The only institution of the kind at present showing signs of success is the Mufassil Bank."

Measures of Weight II.

Table of weights.	Equivalent in grains or tolas of 180 grains.	Purpose for which used.	Localities in which used.	Remarks.
I.—Junu .4 ju=1 rattī. 8 rattī=1 masha. 12 masha=1 tola. 5 tola=1 chatak or chatanki. 16 chataks=1 seer. 40 seer=1 maund.	.. 150 grains 80 tolas .. 76 tolas ..	Weight up to tola for jewellery and Indian drugs; larger weights for most ordinary commodities wholesale and retail but to a limited extent only.	Below tola in tahsil Gorakhpur; higher weights in the towns to some extent and on the railway in particular.	In the tables the various seers reported have been noted, and their equivalents in tolas which are reported differently in different tahsils. The abbreviations used are D. G. District Gazetteer, 1909 edition G. P.—Gorakhpur pice.
II.—Seer (with corresponding chatak and maund).	88 tolas ..	Brass, copper, and bronze wares, wholesale and retail.	Larger bazars in Deoria tahsil.	II.—Hata. M. Maharajgunj. P. Padrauna, denoting the various tahsils from which the varying equivalents are reported.
III.—Seer (with corresponding chatak and maund).	98 tolas ..	Every kind of grain, fuel, vegetables, milk, ghi, and oils, i.e., all eatables, wholesale and retail.	Only in villages	(i) The 80 tola seer is known as the sirkari or lambhari seer, and in tahsil Hata as the seer of 24 gandas. D. G. says it is but little used save in official transactions.
IV.—Seer (with corresponding chatak and maund).	98 $\frac{3}{6}$ tolas	Condiments, boiled sugar cane juice.	Parts of Gorakhpur and Hata.	
V.—Seer (with corresponding chatak and maund).	100 tolas..	..	Padrauna, pargana Hata.	
VI.—Seer (with corresponding chatak and maund).	104 tolas..	..	Parts of Gorakhpur and Hata.	
VII.—Seer (with corresponding chatak and maund).	105 tolas..	Sugar and gur, wholesale and retail, fuel, wholesale.	Larger Bazars in Deoria.	
VIII.—Seer (with corresponding chatak and maund)	105 $\frac{4}{9}$ tolas	..	Parts of Gorakhpur and Hata.	

Measures of Weight. II—(continued).

Table of weights.	Equivalent in grains or tolas of 180 grains	Purpose for which used.	Localities in which used.	Remarks.
IX.—Seer (with corresponding chatak and maund).	108 tolas	Parts of Gorakhpur and Hata.	
X.—Seer (with corresponding chatak and maund).	128 tolas ..	All vegetables, both wholesale and retail, fuel retail.	Gorakhpur City ..	
XI.—Seer (with corresponding chatak and maund)	144 tolas ..	Grain, wholesale and retail, fuel wholesale.	Ditto ..	
XII.—Seer (with corresponding chatak and maund). 6 seer = 1 panseri .. 8 panseri or 48 seer = 1 maund.	40 tolas ..	Iron and salt, retail	Most bazaars in Hata tahsil.	
XIII.—Seer (with corresponding chatak and maund).	48 tolas ..	Salt, wholesale and retail, tobacco retail.	Ditto ..	
XIV.—Seer (with corresponding chatak and maund)	50 tolas ..	Draums, ghi, oil, etc., retail ..	Ditto ..	
XV.—Seer = 8 ganda (G. P.)	29 tolas	Padrauna ..	
XVI.—Seer = $8\frac{1}{2}$ ganda (G. P.) 40 seer = 1 maund.	30 tolas ..	Ordinary retail trade	Padrauna eastern portion.	XVI.—There is no weight of this series smaller than a quarter seer.
XVII.—Seer = 11 ganda (G. P.)	40 tolas ..	Iron retail ..	Deoria ..	
XVIII.—Seer = 12 ganda (G. P.)	44 tolas .. $43\frac{1}{2}$ tolas (M.)	Tobacco and salt retail	Deoria ..	
XIX.—Seer = 13 ganda (G. P.)	47 tolas ..	Salt, tobacco, grain	Hata ..	

XX.—Seer=13½ ganda (G. P.) 6 seer=1 panseri ..	49 tolas .. 50 tolas (M) (P.)	Grain	Part of tahsil Hata ..
XXI.—Seer=1 maund .. XXI.—Seer=13½ ganda (G. P.)	54 tolas (H) 50 tolas (M)	Grain	Part of tahsil Hata and pargana Silhat ..
XXII.—Seer=14 ganda (G. P.)	54 tolas (H) 51 tolas ..	Most retail transactions	..	Deoria and Hasanpur bazaar (Hata).
XXIII.—Seer=21 ganda (G. P.)	77 tolas (M) 77½ tolas (H.)	Brass, iron, copper, etc.	..	Part of tahsil Hata ..
XXIV.—Seer=22 ganda (G. P.)	80 tolas (M) 87 tolas (H)	Cotton, metalwares	..	Ditto ..
XXV.—Seer=24½ ganda (G. P.)	98½ tolas (H.)
XXVI.—Seer=25 ganda (G. P.)	87½ tolas (H.)	Salt, tobacco, Surthi, etc.	..	Ditto ..
XXVII.—Seer=27 ganda (G. P.)	90 tolas (M) 87 tolas (H)	All ordinary commodities	..	Tahsil Padrauna ..
XXVIII.—Seer=27½ ganda (G. P.)	93 tolas (M.) 108 tolas (H.)	Grain, ghi, gur, and vegetables	..	Part of tahsil Hata.
XXIX.—Seer=28 ganda (G. P.)	100 tolas (H.) (M.)	Ditto	..	Ditto ..
XXX.—Seer=32 ganda (G. P.)	110 tolas (P.)	Ditto	..	Hasanpur bazar (Hata), Gorakhpur tahsil.
XXXI.—Seer=36 ganda (G. P.)	102 tolas .. 116 tolas ..	Grain	..	Ditto ..
XXXII.—Seer=40 ganda (G. P.)	128 tolas .. 144 tolas ..	Do.	..	Ditto ..
XXXIII.—Panseri of 81 (G. P.)	294 tolas ..	Do.	..	Tappa, Tarkulwa, Majhawa Padiyapur, Patua Pargana Shah- jahanpur.

Measures of Weight II—(concluded).

Table of weights.	Equivalent in grains or tolas of 180 grains.	Purpose for which used.	Locality in which used.	Remarks.
XXXIV.—Panseri ..	498 tolas..	Sugar.		
XXXV.—Panseri ..	527 tolas..	Gur, sugar and rab sale	Pariyapur, Bichauli ..	(XXXXVI.) The bhar is regarded as the weight of one Gorakhpur pice, seven G. P. being regarded as equal in weight to five tolas.
XXXVI.—Bhar ..	517 tolas..	Ditto	Banchara, Singhpur ..	
4 bhar = 1 ganda of (G. P.)	6	Ditto	Narainpur, Choaraha ..	
7 bhar = 1 ohatak ..	$2\frac{6}{7}$ tolas..	Ditto	Parwarpur, (tahsil Hata) ..	
XXXVII.—Ratti ..	5 tolas..			
8 ratti = 1 masha	..	Jewellery and drugs	Gorakhpur tahsil ..	(XXXXVII.) This tola is regarded as one rupee weight plus twelve rattis.
12 masha = 1 tola ..	2057 grains			
XXXVIII.—Sarson (mustard seed)	..	Indian medicines	Larger bazars in Deoria tahsil.	
6 sarson = 1 Jau (barley corn.)	$1\frac{1}{192}$ tola			
6 jau = 1 ratti ..	$1\frac{1}{32}$ tolas			
12 ratti = 1 masha	3 tolas			
4 masha = 1 sand				
2 sand = 1 kol				
2 kol = 1 Karsh				
2 karsh = 1 shukli				
2 shukli = 1 pal				
2 pal = 1 pawa				
2 pawa = 1 seer	96 tolas			
40 seer = 1 maund				

Measures of Cubic Contents.

Table of measures.	Principal Indian measures.		Purpose for which used.	Localities in which used.	Remarks.
	Equivalent in British measure.	How defined.			
Cubic balisht	243 cubic in. (about)	Whole district	Occasionally used.
8 Cubic balisht = 1 cubic hath	$8\frac{3}{8}$ cubic feet	..			

Measures of Length.

Tables of measures.	Equivalent in British measures.	Purpose for which used.	Locality in which used.	Remarks.
(I) Angul (finger's breadth) 4 angul = 1 girah 8 girah = 1 hath 2 hath = 1 chhota Lamcari or Sirkari Gaz (yard)	Cloth measurement	In cloth merchants' shops throughout district and widely for all ordinary purposes.	(I) One witness gives 3 angul = 1 girah.
(II) Gorakhpur gaz. (with corresponding girah and hath).	38" 40 1/2"	Cloth measurement	Gorakhpur city only	(II) Defined as two hath and 6 angul which would be strictly 39.9".
(III) Gaz (and corresponding girah and hath).	38"	Ditto	Tahsil Bausgaon ..	
(IV) Ditto	35"	Ditto	Gauri Bazar circle, Pargana Silhat, Gorakhpur city ..	
(V) Kazi-ka-hath	19 1/2"	Cloth, wood and buildings.	Padrauna.	(V) Said by some to be 3/4 hath and 3 angul, but others say one hath and 4 angul.
(VI) Hath ..	15"	Land measurement	Whole district ..	
(VII) Kari	Land measurement	Bausgaon tahsil ..	
10 karis = 1 katha 10 katha = 1 jarib (chain)	66"

(XV) Pao bhar	½ mile (about)	..	Measuring distance	..	Ditto	..
2 pao = bhar 1 dhap	..	1 mile	..				
2 dhap = 1 kos	2 miles	..				
(XVI) British linear measure	(XVI) The inch and foot are fairly widely known by some persons in the district and the diameter of the pice is recognized as one inch.

Measures of Capacity—Liquid.

Table of measures.	Weight of water contained in measure.	How defined.	Purpose for which used.	Localities in which used.	Remarks.
I.—Nupahi ..	85 tolas	Tari, retail ..	Gorakhpur tahsil ..	(1) Eastern tumbler-like vessels. Besides the measures here mentioned, the dry measures of capacity (mana, sel and rajia) with their local variations, are used for milk in some places.
II.—Labni ..	80 tolas	Tari retail and wholesale.	Ditto ..	
III.—Pawahi ..	2 seers	Oil retail ..	Tahsil Mahrajanj ..	
V.—Ghunchi	
4 ghunchi = 1 rajia	..	The rajia is said to contain about 50 tolas milk.	Milk, wholesale and retail	Tahsil Deoria ..	

Measures of Area.

Table of measures.	Principal Indian measures.		Purpose for which used.	Locality in which used.	Remarks.
	Equivalent in British measure.	How defined.			
I.—Bigua	3,025 square yards or $\frac{1}{4}$ acre.	..	Land measurement (Government records). Ditto ..	Whole district ..	The bighas (II)—(IX) are derived from a conversion table sent by the Collector and printed under his aegis for the use of the land records staff. They do not agree with the bighas reported by him otherwise, his report including bighas of 2,500 and 3,337 $\frac{22}{29}$ square yards while all of these bighas have been omitted. D.G. speaks of village bighas varying from 1,888 square yards. In Unwala (of no. (IV) to 4,400 square yards in Tilpur (no. (IX). These local bighas are all defined as squares of 20 Lathas each side, the length of the Latha varying greatly.
II.—Do.	3,332.2 square yards	..	Ditto ..	Salempur ..	
III.—Do.	3,132.7 ditto	Ditto ..	Chilupur and Silhat ..	
IV.—Do.	1,881.4 ditto	Ditto ..	Bhawapar, Dhuripar and Unwala.	
V.—Do.	3,168 ditto	Ditto ..	Gorakhpur, Hata and Mahrajganj.	
VI.—Do.	3,333.3 ditto	Ditto ..	Shajahanpur ..	
VII.—Do.	3,520 ditto	Ditto ..	Hasanpur and Margar.	
VIII.—Do.	3,967.2 ditto	Ditto ..	Sidhwa Jubna ..	
IX.—Do.	4,400 ditto	Ditto ..	Tilpur and Benayakpur.	
X.—Acres and hundredths (decimals).	Ditto ..	Whole district ..	

Measures of Capacity—Dry.

Table of measures.	How defined.	Purpose for which used.	Localities in which used.	Remarks.
I.— <i>Mana</i> or <i>Manhai</i> 4 mana=1 sayee or sei. 6 mana=1 rajia	A sei contains about 104 tolas of water and is supposed to contain 100 tolas of old rice struck, the mana 160 tolas. Usually fully heaped some times moderately heaped or struck.	These measures are used for retail sale of grain of all descriptions in the villages.	Tahsils Gorakhpur and Padrauna except eastern part; (villages only).	The mana, sei, and rajia are slightly conical shaped vessels of iron or wood of variable diameter. (II) 32 rajia of grain are deemed equal to 48 seers standard weight.
II.— <i>Mana</i> 4 mana=1 rajia (<i>rajeys</i>) or <i>razia</i> . 32 rajias=1 maund 32 maunds=1 khar	Rajia contains 160 tolas water. Fully heaped and struck both but apparently more usually struck. Gon or don contains about 5 standard maunds of grain.	Grain of all kinds.	Parts of tahsils Mahrajanj and Hata.	(III) These measures are very variable; the rajia appears to be sometimes 1½ sei, at others an independent measure, representing the capacity required to contain a certain number of gandas (larger than the number that go to the seer of the locality) of Gorakhpuri pice or grain (usually rice). The sei is the measure that contains a local seer of grain usually rice. Both vary in the way described as regards weights. The only certain part of the table is 4 mana = 1 sei; the rest is very variable.
III.— 4 mana or manhai=1 sei or sayee. 16 sei=1 mani 8 mani=1 maund 16 mani=1 gon or don 6 don=1 khar	Gon or don contains about 5 standard maunds of grain.	Ditto	More or less over whole district. (See remarks)	(IV) The seeri is an iron measure.
IV.—Stamped or <i>lambari seeri</i>	Contains one local seer	Spices, wholesale and retail.	Tahsil Padrauna	
V.— <i>Rajia</i> =40 gandas of Gorakhpuri pice	Fully heaped	Rice, wheat, arhar, maize, and other grains, in every circumstance. Grain, both wholesale and retail.	Padrauna (north and west).	
VI.— <i>Rajia</i> =12 gandas of Gorakhpuri pice.	150 tolas moderately heaped.		Parts of tahsils Gorakhpur, Hata, and Mahrajanj.	

CHAPTER III.

CENSUS OF 1901.

Page 90, line 28, *alter* "75" to "750"

At the end of paragraph 2 at page 90, *add*—

"The number of inhabited towns and villages was 7,562, of which 7,473 contained less than 2,000 inhabitants, 77 between two, and five thousand and 12 had larger populations; the last comprised all those in the list of 1891 except Gola and Madanpur."

CENSUS OF 1911.

Page 90, *after* second paragraph, *insert* a new paragraph, as follows :—

"During the next ten years, in spite of the ravages of plague and cholera the population increased to 3,201,180 in 1911; this great increase of 262,495 persons, raised the average density to 707, higher than it has ever been before, the highest figure being 887 for Deoria, followed by 824 for Hata, 818 for Gorakhpur, 773 for Bansgaon, 702 for Padrauna, and 486 for Mahrajganj, showing that every tahsil except Deoria had more than recovered the ground it had lost during the decade 1891-1901."

TOWNS AND VILLAGES.

Page 90—*Delete* the whole paragraph and *substitute*—

"The number of inhabited towns and villages was 7,565, of which 7,459 contained less than 2,000 inhabitants, 100 between two and five thousand and seven had larger populations. These comprise Gorakhpur, Goura-Barhaj (these two towns being administratively one), Rudarpur, Padrauna (including Sahibganj), Lar, Bansgaon, and Salempur-Majhauri. The urban population including that of these towns and also of Siswa, Bansgaon, Rampur, Karkhana, Paina, Gola, Barhalganj, Pipraich, and Deoria amounted to 136,872, or 4.28 per cent. of the whole—as compared with 1.5 per cent. in Basti and 3.9 per cent. in Gonda. The urban population shows a remarkable decrease, for it was 5.4 per cent. in 1901. Apart from the city of Gorakhpur, the population of which owing to plague and cholera has been diminished by 7,256, there is a marked decline in the population of towns like Paina, Gola, and Barhalganj on the Ghagra—pointing to a decrease in importance of the river-borne traffic

Gaura-Barhaj, however, shows an increase which is probably due to its position on the railway rather than on the river. Other towns which show an increase are Siswa and Deoria, both on the railway, and Bansgaon which has now been connected with Gorakhpur by a metalled road, though the increase in Deoria and Bansgaon is mainly due to their administrative importance. The larger villages are fairly numerous, being, as a rule, local centres of commerce which are likely to grow in the near future. The majority of the villages are, however, small as is the case throughout the eastern districts, though the last ten years show a decided tendency for the villagers to increase; the average population is 406 as compared with 370 in 1901, while the percentage of inhabitants residing in villages of less than 500 persons has decreased from 43·4 to 38 per cent. as compared with the provincial average of 34·4 per cent. The figures for the district would certainly be greater but for the fact that in the north the area of the mauzas is often extremely large—such villages containing within their limits great numbers of petty hamlets, each of which represents a separate clearing and settlement in the forest."

SEX.

Page 91, *delete* "of the whole population . . . preponderance of females" lines 13 to 26 and *substitute*—

"Of the whole population 1,604,635 were males and 1,596,545 females, the latter comprising 49·88 per cent. of the total as contrasted with 50·3 per cent. in 1901. The relative proportion seems to be fairly constant, as the proportion of females was 49·98 in 1891 and 50·09 in 1881. The corresponding figures in 1872 were 46·6 per cent. in 1865, 47·03 per cent. and 47·6 per cent. in 1853, though these figures were probably vitiated in part by concealment. The Sadar and Mabrajganj tahsils have always shown an excess of males as in other districts north of the Ghagra. Deoria and Hata seem to vary, but in Padrauna and Bansgaon there is a preponderance of females as in the Benares division to the South."

Page 91, line 35, *delete* "While the same thing occurs" and *substitute* "The same thing occurring."

Line 36, *after* "Musalmans" *insert* "While the Gonds and

Chamars show a very decided preponderance of females, the proportion of females among the Gonds being as high as 51·4 per cent."

MIGRATION.

Page 92, lines 3 to 39, *delete* the whole paragraph on migration and *substitute*—

"The 1911 census figures of migration in this district show an excess of immigrants who number 152,000; of these, 130,000, or 85·5 per cent., come from contiguous districts and five per cent. from countries outside India. The number of emigrants is stated as only 136,000, of whom nearly 88,000, or 65·7 had gone to the adjoining districts and the rest to various parts of India, 75 per cent. of the latter being males. This emigration is undoubtedly in search of labour; numbers of labourers betake themselves for several months every year to Bengal and Assam, Calcutta, Howrah, and even Rangoon, earning high wages from October to the beginning of the rains. The volume of such immigration is however small in comparison with that from all parts of the Benares division, in which labour is more abundant and the pressure of the population on the land is far more severe. These emigrants go by river as well as by rail, and for this reason exact figures are unobtainable, but in an ordinary year the number is about 10,000, though in seasons of high prices and agricultural distress it may rise to three times that figure. As the last 10 years have been more favourable economically than the preceding decade, the proportion of internal emigration has decreased; of all the persons enumerated in India who gave Gorakhpur as their birthplace 4·46 per cent. were found elsewhere in 1901, but only 4·27 per cent. in 1911. Of course there are no means of ascertaining the period in which this emigration took place, but it must be pointed out that the census figures are misleading, for the very considerable emigration to Nepal has not been included; this may be estimated at about 40,000.

"Further, a certain amount of overseas emigration comes from this district, though the volume of this is relatively small amounting to only 846 persons annually. At any rate, it seems, certain the district has not really gained more by immigration

than it has lost by emigration. In 1891, eight per cent. of the inhabitants of the district were born elsewhere, but in 1901 the proportion was only 4·15 per cent.: the last decade indeed shows a rise to 4·73 per cent., but the proportion of natives continues to be greater than in almost any other part of the United Provinces, which however is probably mainly due to the large area of the district and consequent low ratio of length of boundary to area."

Page 93, line 2, *delete* "2,658,074 . . . of other religions" and *substitute*—

"2,875,402, or 89·82 per cent. were Hindus, 322,946, or 10·09 per cent. were Musalmans and 2,832 of other religions."

Page 93, line 6, *delete* "considerable."

„ 95, lines 17 to 19.

Line 13 *after* "marriage" *add* "and also of course to the legality of widow remarriage."

8·1	<i>ditto</i>	8·01
6·1	<i>ditto</i>	6·14

Page 33, line 22, *for* "last census" *substitute* "census of 1901."

Page 93, line 35, *for* "nearly" *substitute* "over."

„ 94, lines 2 to 10, *delete* "Altogether . . . in each case" and *substitute*—

"Altogether exclusive of 24,239 persons whose caste was not specified, representatives of 75 different castes were found apart from sub-divisions. Many of these however are quite unimportant, since in 19 instances the number of persons was less than 1,000, and in 13 others it was less than 5,000.

"There are eight castes with more than 100,000 persons apiece and these constituted 61·35 per cent. of the total population, while a further 33·35 per cent. was contributed by 16 castes with numbers ranging from 100,000 to 25,000 in each case."

CHAMARS.

Page 94, lines 16 to 19, *delete* "The foremost place . . . community" and *substitute*—

"The foremost place is occupied by the Chamars aggregating 391,952 persons, or 13·6 per cent. of the Hindu community."

AHIRS.

Page 94, line 32,

<i>Alter</i> 342,210 to	367,099
" 12·87 to	12·7

BRAHMINS.

Page 95, line 10.

<i>Alter</i> 262,987 to	280,157
" 989 to	9·74

Page 95, line 14 to page 96 line 2, *delete* "The bulk clans" and *substitute*—

"The bulk of the Brahmans, amounting to 87·5 per cent. of community, are described as Sarwarias though the Sakaldipi, Kanujia, and other sub-divisions are somewhat sparsely represented. Some of the Brahmans of the district are called Sawalakhis; the story being told that a king of Benares gave a feast to 125,000 Brahmans, but that as the requisite number was not forthcoming, he made requisitions on other tribes and gave them Brahmanical rank. The Sarwarias themselves indignantly deny that this refers to any of their sub-divisions. According to their own accounts, Sarwaria is a Sanskrit word meaning the most respected; in support of this interpretation they allege the fact that the Pankti pavans, who are to be found only among the Sarwarias, are given the foremost place among Brahmans in the Manusmrit. Their legends say that the whole tract north of the Ghagra, bounded by the Great Gandak on the east and the Ramrikha on the west was given to their ancestors by Ram Chandra on his return from Ceylon, for conducting the great sacrifice. Hence they are sometimes called Sarjuparis or inhabitants of the country north of the Ghagra, though they are now to be found in other parts of the country also. They are foremost among the land-owning castes of the district and hold a large area as tenants, but their skill and industry in agriculture are by no means conspicuous. Like all Brahmans, they are handicapped by the fact that they are forbidden to handle the plough; and their other caste rules especially those regarding

food and marriage. According to their traditions the most ancient settlements are those of the Tiwaris in Gorakhpur itself and in Pidi in Deoria; the Shukuls in Bhendi of pargana Silhat; the Dubes of Sarar in pargana Haveli Gorakhpur; the Misras of Baisi and Payasi in the same pargana, and the Bhargavas of Singanjori in Padrauna, who have removed there recently from Bhagalpur on the Ghagra, while the other sub-castes are the Upadhya, Panday, Chaubes, Pataks, and Ojhas.

KURMIS AND SAINTHWARS.

Page 96, lines 3 to 14, *delete*—

“The Kurmis are . . . separate caste” and *insert*—

“Next come the Kurmis and Sainthwars, who together number 213,899, or 7·43 per cent of the Hindus. The Kurmis are strongest in the east, but the Sainthwars are found in all tahsils and number 104,057. They were originally a sub-case of the Kurmis, but chiefly because of the rise of their leading family that of the Raja Padrauna, they are now practically a separate caste. They are endogamous and have given up widow remarriages and claim precedence as being of the purest descent; in fact their legends claim for them descent from Mayur, the founder of the great Bisen clan of Rajputs. The Kurmis also now claim a similar descent.

At end of paragraph, line 31, *add*—

"It is a remarkable fact that whereas, during the last decade the Banias throughout the province show a decrease amounting to 16·9 per cent., in Gorakhpur they have increased by over 20 per cent."

Page 99, at end of paragraph on Banias, *insert* a paragraph on Rajputs, as follows :—

RAJPUTS.

"The Rajputs, on the other hand, show a considerable decrease ; they now number only 97,095, or 3·37 per cent. of the Hindu population as compared with 140,520 in 1901, a decrease of nearly 46·7 per cent. Part of this is doubtless a natural decrease, and part due to emigration ; but it seems probable that the greater part of the decline is fictitious and due to faulty returns in 1901, when several members of other communities palmed themselves off as Rajputs. The Rajputs of this district are generally agriculturists by profession, but their skill in cultivation is indifferent. They belong to an endless variety of clans the census, of 1911 showing representatives of 38 different sub-divisions. Not many of these, however, are of much local importance. The foremost place is taken by the Bicans, of whom there are 14,292 distributed

all over the district, though the largest number is naturally to be found in the Deoria tahsil, in which is situated Majhau, the headquarters of this ancient clan. The Bais, 7,345, belong mainly to the Bansgaon tahsil. Though they claim connection with the celebrated families of Unao and Rai Bareilly, their high rank is not generally admitted and they are in all probability of mixed descent as are the Bais of Fyzabad and the eastern districts as a whole. They style themselves by several names and this seemingly accounts for the great reduction in their number since in 1822 and 1891 there were more than 12,000 persons recorded as of this clan. The Panwars have decreased from 10,912 in 1901 to 2,874 in 1911; they have never attained a position of much prominence; apparently they came to the district in small detachments gaining a footing gradually by marriage with the daughters of the Majhau house.

"The Sarnets were not separately enumerated in 1911, but in 1891 they numbered 11,810, chiefly in the Gorakhpur, Hata, and Bansgaon tahsils.

"They are said to be identical with the Nikumkhs and their history will be given later. Similarly, the Kausiks numbered 7,215 in 1891, residing mainly in Bansgaon and some account of this clan will be found in the article on the Dhuriapar families. There were only 2,180 Surajbansis in 1911 as compared with 6,444 in 1901; the name is often adopted by so-called Rajput immigrants from the hills, while in other cases Surajbansis represent offshoots of the ancient house of Amorha in Basti. The other clans though fairly well represented are of singularly little importance, generally, because their settlement in this district is of recent date, their ancestors coming rather as agricultural colonists than as conquerors. The strongest are the Chauhans, 4,501, who are the only clan showing an increase in the last decade; they are found everywhere, those in the north claiming connection with the Butwal house often calling themselves Chitorias in support of the story that their ancestors fled hither from Chitor on its capture by the Musalmans. Next come the Chandels, 2,963, chiefly in Deoria and Padrauna, the Dikhits, 2,700, from Ghazipur and elsewhere, the Sikarwars, 2,671, and the Amethias 2,344 who reside for the most part in Deoria

and came from Amethi south of Bara Banki. Other clans exceeding 1,000 apiece are Sombansis from Partabgarh (1,710), the Raghubansis from Ajodhya (1,517), the Rathors (1,421) who are said to have settled at a very early date in Hata and Gorakhpur, and the Sugars from Ballia (1,350). Among the less numerous local clans of low social status and mixed descent the Donwars or Domwars may be mentioned, as they are sometimes supposed to be the descendants of the old Domkatar rulers of Gorakhpur."

Page 99, line 32, page 100, line 1, *delete* "Nothing need be said . . . 35,562 persons" and *substitute*—

"Nothing need be said of the Telis, 96,010; Bhars, 76,014; Lunias, 73,377; Kumhars, 63,000; Lohars, 61,584; Dhobis, 53,441, and Pasis, 52,493, while the Mallahs have already been mentioned" These castes are common everywhere and their numbers are unusually large only because of the unusual size of the district. Next follow Nais with 46,199, Kalwars with 42,183 persons."

Page 100, line 2, *alter* 32,037 to 35,664.

"The other castes with more than 10,000 representatives are Kayasths, 29,803; Barhais, 28,240; Sonars, 19,806; Kamkars, Bel-dars, and Binds already mentioned; Gadaryas, 16,471; Musahars 14,126, who are an aboriginal tribe resembling the Doms and belong mainly to the east; and Khatiks or green grocers 10,281.

The Atits or priestly mendicants come next with 9,366 persons; the caste is strongest in Padrauna and still more common in the adjoining district of Saran. Among other aboriginal tribes may be mentioned the Dharkars, 4,955, and the Bansphors, 1,129, both of whom are allied to the Doms. „ 101, „ 2, line 14 *delete* "and at present . . . 457 children" and *substitut* "and they managed to cke out a

precarious existence by begging and thieving, while their women were not seldom prostitutes. In 1908 the Salvation Army took over the task of reclaiming them and established a settlement at the old jail building in Gorakhpur, to which the inmates of several domrakhanas were gradually transferred. At first their only means of livelihood was by working on the conservancy staffs of the municipality and notified area, but now many of them are employed in weaving, bag, and basket-making, and mulberry-cultivation and the like; slow but steady progress is being made; even amongst adults, while excellent results are obtained with children who are, as far as possible, removed from evil associations. A day school is held at the old jail and a receiving home for them has been established at Shahpur, while a new school is being built at Tiwaripur for the same purpose. The numbers at the Salvation Army Settlement are apt to vary considerably; in 1915 they numbered 596, of whom 221 were women and 145 children. The Doms still remaining in the Domra Khanas numbered 783, including 142 children. These show no improvement and continue to be confirmed pilferers and beggars, levying a toll from village shopkeepers by threatening to steal from them if not given a dole either in cash or kind. The registration of the Doms under the new Criminal Tribes Act was effected in 1915, and they have been granted a little more liberty; it is too early yet to say definitely what the results will be, but there seem very strong grounds for hoping that the methods of the Salvation Army will be successful."

“The number of Christians at the census of 1911 was 1,608 as compared with 1,443 in 1901. The Native Christians numbered 1,160, the figure having risen from 808 in 1831 to 352 ten years later and 1,040 in 1901. Of the Native Christian community 649 belonged to the Anglican communion, Protestants numbered 160 and Salvationists 169, while 152 returned themselves in 1911 as belonging to no sect.”

Page 104, line 24 to page 105, line 6, *delete*—

“The inhabitants . . . orphanages” and *substitute* “The inhabitants of those villages were at one time principally cultivators, but as their prosperity has increased many of them have given up agriculture as their chief source of income and seek employment on the railway in various capacities. Much attention is paid to industrial training and the women and girls are particularly expert in drawn thread work, which received the highest award at the Allahabad exhibition of 1911 and is probably the best of its kind produced in India. It commands a ready sale. The educational work of the mission is of great importance. The chief institution is St. Andrew's College which was founded in 1901 and raised to the status of a first grade college in 1916; its new buildings were opened the same year by His Honour the Lieutenant-Governor. For its rise it is probably one of the best staffed and best equipped colleges in the province. St. Andrew's School is situated close to the college but in grounds of its own. It has for many years borne a high reputation as an educational

institution; it is shortly to be rebuilt on its present site, which is one of the best in the city. Both school and college have hostels attached for the housing of students who come in from the district. There are at present no less than six English graduates teaching and supervising the educational wants of the mission.

"In addition to the above institutions, the mission has considerable Anglo-Vernacular Middle School in Alinagar, a successful Vernacular Middle School called the Swinton Memorial School in Sahebganj, four primary schools in the city, and five others in villages hard by. In all there are about 1,200 boys in the educational institutions of the mission. Working in association with the Church Missionary Society is a branch of the Zenana Bible and Medical Mission which has two ladies working in the city and managing primary schools for girls, with a daily attendance of from 400 to 500.

"Evangelists' work is not carried on to any such extent in the district, what there is mainly effected by the Swedish missionaries at Deoria and Barhaj, but small number of conversions however take place every year, but these do not as a rule add to the total strength of the Native Christian community in the district, for converts generally go off to other districts. The numbers of the Christian community are increased mainly by the natural growth of the three villages. The large orphanages which used to be maintained by the mission and which used considerably to increase the number of adherents to Christianity have now been removed to Agra and Benares."

Page 105, line 10, *delete* "acts as chaplain" and *substitute* "Usually acts as honorary chaplains."

„ 105, „ 13, „ 8 to 6.

„ 105, „ 13, „ 5 to 3.

„ 105, „ 18, *for* "of little importance" *substitute* "of not great importance."

Page 105, line 34, *alter* 72.89 to 39.62.

„ 105, „ 36, *delete* the rest of the paragraph from "while in addition . . . jail" and *substitute*—

"This proportion has increased from 72·39 per cent. in 1901 and is much above the provincial average of 71·74 per cent.

"The increase is doubtless due to the rise in agricultural wages and the favourable reasons preceding the census, which made agriculture more lucrative to the artisans who had a few fields of their own so that agriculture became more important as a source of income than their sugar trade; there was a similar increase throughout the province. The preparation and supply of material substances which includes industry, transports, and trade engages the attention of only 221,357 persons, or 6·91 per cent. of the entire population; of these, industry accounts for 128,057 persons, or 4 per cent of population, of whom 23·6 per cent. are engaged in industries connected with dress and toilet, 16·7 per cent., in food industries, 12·3 per cent. industries connected with wood, and 10·8 per cent. are engaged in the preparation of oils; next come the textile industries with 9·3 per cent. and industries connected with luxuries (mostly jewellers) with 9 per cent. followed by workers in earthenware with 7 per cent. and those in metals with 5·6 per cent.; workers in leather are only 1·1 per cent. of the industrial population. Transport engrosses the attention of and supports only 17,368 persons, or ·5 per cent. of the population. Trade and commerce support 75,932 persons, or 2·37 per cent of the population, of whom no less than 73·4 per cent. are connected with foodstuffs, 6·48 per cent. with textiles, and 4·71 per cent. with the higher branches of commerce (banking, exchange, insurance, etc.). The proportionately small number of traders is of course due to the fact the manufacturer and trader are often one and the same. The police and other servants of the State number 25,912, or ·81 per cent. of the population; the learned professions and liberal arts claim 9,093, of whom 44 per cent. are engaged in religion, and 19 per cent. in law, while 15 per cent. are connected with instruction and 14·5 per cent. with letters arts, etc., of all kinds and only 7·5 per cent. with medicine. The lucky few who need not work at all are only 636; while domestic servants number 24,992 and form ·78 per cent. of the population. No less than 22,476 persons are insufficiently described while beggars amount to 20,726, persons or ·65 per cent. of the population of the district."

June, 1914 and was succeeded by Babu Dan Bahadur Chand, the son of Babu Kharag Bahadur Chand of the Hata branch of the family, who had been adopted by the late so-called Rani. The estate comprises 40 villages in the Bansgaon tahsil, in addition to several others in Azamgarh and Partabgarh, paying a land revenue of Rs. 9,632 annually."

Page 116, line last to page 117, line 4 *delete* "who had been . . . at Gajpur" and *substitute*—

"Udit Partap Narayan Singh, who had been appointed to the Committee of Administration in 1857. His title and remaining estates were confiscated and he himself died in the Andaman Islands while his son's widow established herself in the old fort at Gajpur. Some years later the old palace at Rudarpur was restored to his grandson, Bijai Partap Narayan Singh, who died in 1898. The estate was then taken over by the Court of Wards during the minority of his son, Ravi Partap Narayan Singh, The latter signalized his coming of age by founding a girls' school at Rudarpur in 1915 to which he has since added a Boys' Middle School. The estate pays an annual revenue of Rs. 4,195, the majority of the villages being in Hata. It has always been treated as an 'impartible' estate, the younger members of the family being only entitled to a limited allowance during their lifetime."

Page 117, line 20. *After* "Raja" *insert* "was appointed an Honorary Munsif in 1915 and."

Page 117, line 24 to page 118, line 25, *delete* the whole paragraph and *substitute* the following :—

"The Tamkohi Rajah belongs to the Bagauchhis clan of the Bhuinhar Brahman caste and claims descent from Mayur Bhat, the founder of the Majhauili Raj, by his Bhuinhar wife. The offspring of this union received as his share the north-eastern portion of the estate, which for many centuries was held by his descendants and is at present comprised in two estates Hathwa in Saran : Behar and Tamkohi in Gorakhpur (U. P.). The house of the family was at Husapur in pargana Kallianpur Kuari of the Saran district in Behar. The first Raja to rise to prominence was Kalyan Mull, who obtained the recognition of his title of Raja from the Emperor of Delhi together with a drum

and flag and the fish crest of a Mansabdar.

“Sixth in descent from (him came) Rajah Chandharb Sahi *alias* Rajah Hamir Sahi, who obtained in recognition of his services a *khillat* and the badge of “Lion” from Mohammad Shah, Emperor of Delhi. He was succeeded by his brother, Raja Nirpat Sahi *alias* Rajah Tirbhuan Sahi, whose descendants ruled at Husapur till the days of Raja Fateh Sahi. The latter refused to acknowledge the authority of the East India Company and after the battle of Buxar in 1764 A.D. he was compelled to leave his family seat of Husapur and removed to Bank Jogni (now called Tamkohi) in Gorakhpur, the dominion of the Nawab Wazir of Oudh. The major portion of the family property which was at that time in Sarkar Saran remained for years at the disposal of the East India Company and was then granted to Babu Chhatradhari Sahi, a member of the next branch of the family.

“Babu Chhatradhari Sahi was invested with the title of ‘Maharaja Bahadur’ and was the sixth ancestor of the present Maharaja of Hathwa.

“Raja Fateh Sahi had four sons and all of them made various attempts by approaching the authorities of the East India Company to obtain the restoration of their lost property in Saran, but did not succeed and Raja Fateh Sahi during his lifetime abdicated his estate of Bank Jogni in favour of his eldest son, Raja Arimardan Sahi, installed him on the *gaddi* and wrote a *sanad* of Babuship granting villages to his remaining three sons, Babu Dalmardan Sahi, Babu Shamsher Sahi and Babu Ranbahadur Sahi as their Haq Babuai. Rajah Fateh Sahi after this, passed his life as an ascetic.

“After the death of Raja Fateh Sahi Babu Shamsher Sahi got his Babuai villages legally separated and settled in one of these at Salemgarh.

“His descendants are the present proprietors of the Salemgarh estate.

“Babu Dalmardan Sahi and Babu Ranbahadur Sahi had also their respective Babuai villages in their separate possession, but they continued to live at the ancestral abode at Tamkohi.

“Rajah Arimardan Sahi died without issue and after his death Raja Pirthipat Sahi, son of Babu Ranbahadur Sahi, then dead,

took possession of the Raj, alleging himself to be the adopted son of Raja Arimardan Sahi but Raja Dalmardan Sahi brought a suit and obtained the Raj by cancellation of the alleged adoption. Raja Dalmardan Sahi was succeeded by his son Raja Dalip Sahi, but the latter left no child. His widow, Rani Aswamaida Kuari, then took possession of the Raj but since Raja Kharag Bahadur Sahi, son of Raja Pirthipat Sahai, then deceased, was entitled to succeed Raja Dalip Sahi as the only next male heir, Rani Aswamaida Kuari made over the Raj to him in 1851.

“Raja Kharag Bahadur Sahi obtained the recognition of his hereditary title of Raja from the British Government and he received several villages in Gaya from his maternal grandfather, the Maharaja of Tikari. During the Mutiny he prudently kept in the background, remaining loyal, if inactive. He died in 1860 and was succeeded by his only son, Raja Krishna Pratap Bahadur Sahi. The estate was greatly extended during his administration and management. He acquired villages in Gaya under a Mokariri grant from Raja Ran Bahadur Singh of Tikari in return for renouncing his claim to the seven annas, Tikari Raj, in favour of the said Raja Ran Bahadur Singh.

“His eldest son, Raja Shatrujit Pratap Bahadur Sahi, obtained the Sursand Estate in Muzaffarpur through his wife, who was grand-daughter of Raja Raghunandan Singh of Sursand. Raja Krishna Pratap Bahadur Sahi died in December, 1894 and was succeeded by his elder son, Raja Shatrujit Pratap Bahadur Sahi, the younger son, Kuer Sarabjit Pratap Bahadur Sahi being entitled only to a Haq Babuai in accordance with the custom of the family. Raja Shatrujit Pratap Bahadur Sahi died in October, 1898 and was succeeded by his only son, Raja Indrajit Pratap Bahadur Sahi, who was then a minor and in consequence the estate remained under the superintendence of the Court of Wards till the 5th October, 1913, when the young Raja attained his majority and took over the management. During his minority, his uncle, Kuer Sarabjit Pratap Bahadur Sahi, sued for the partition of the Raj as an ordinary zamindari but after protracted and costly litigation the property has been held to be an impartible Raj to be held by one person in accordance with the rule of lineal primogeniture.

"The present Raja was educated at the Colvin Raja Taluqdars' School, Lucknow, and is well-versed in Hindi and knows English and Urdu fairly well.

"The estate comprises 226 villages in the Gorakhpur and Basti districts, paying a revenue of Rs. 90,000 and 132 villages in the Gaya, Chapra, Muzaffarpur, and Darbhanga districts (in Behar) paying a revenue of Rs. 15,000 a year."

Page 118, lines 30 to 38, *insert* a comma after "branches" *delete* "Shamsher Sahi . . . Rs. 22,000" and *substitute*—

"And in fact they represent the elder branch, for they are descended from Shamsher Sahi, the third son of Raja Fateh Sahi, while the Tamkahi Raja is fifth in descent from Ran Bahadur Sahi, the youngest son of Raja Fateh Sahi. Shamsher Sahi had two sons, but the elder died childless and the younger left a daughter, Babuin Ram Charan Kuari, who was married to Babu Ambika Prasad Narayan Singh, a descendant of Raja Paim Narayan Singh of the Chainpur family in Saran. They had three sons. The eldest of these is Raja Sideshwari Prasad Narayan Singh, who in recognition of his public services and liberality during the famine of 1896-97 received the title of Rai Bahadur and in 1907 was awarded the personal title of Raja. Both his brothers are dead, but one of them has left two minor sons. The whole estate is held as a joint Hindu family possession and is ably managed by Kumar Brajeshwari Prasad Narayan Singh, the only son of the Raja. The family is closely related by marriage with the Maharaja of Bettiah and Benares and the Rajas of Shuter and Dhanwar. The family estates comprise 63 villages in the Padrauna tahsil with a revenue demand of Rs. 22,000."

PADRAUNA.

Page 119, lines 1 to 12, *delete* "the Kurmi . . . probable and" *substitute*—

"The Sainthwar family of Padrauna is, according to its own traditions, descended from Bhopal Rai, who is said to have come from Kara in the Allahabad district about 1556 and was employed by the Raja of Majhauili from whom he obtained the grant of five villages in tappa Bansi Chirgora; Kishore Rai was the representative of the family in the time of Shahjahan and was appointed Sarbarakar or administrator of revenue. In 1681 his nephew,

Nath Rai, obtained a similar appointment from Aurungzeb and was later rewarded by grants of land in the Padrauna tahsil with a revenue demand of Rs. 5,500. It has however been suggested."

Page 119, line 22 *alter* "Kurmis" to "Sainthwars."

" 119, ,, 32, *after* Raja *insert* a comma, *delete* "He died . . . Champaran" and *substitute* "and was for some years an honorary magistrate. He died in 1900, leaving two sons; the elder, Rai Braj Narayan Rai, was created Raja in 1906 in recognition of the distinguished position held by his family and of his public spirit and liberality. The Raja is keenly interested in his estate and in education. An agricultural bank was established in 1901 and is managed by the Raja's brother, Rai Jagdish Narayan Rai, who is an honorary munsif. By agreement between the present Raja and his brother, the succession to the title is to pass to Rai Jagdish Narayan Rai and after him to Krishna Partap Narayan Rai, the eldest son of the present Raja, thereafter the succession is to go to the eldest of the survivors. The estate has been considerably extended within the last few years and now comprises 397 villages, mostly in Padrauna, but including a few in Ballia, Azamgarh, and Champaran, paying a revenue nearly one lakh."

Page 120, lines 10 to 13 *delete* "The property . . . the owner" and *substitute*—

"Thereafter for 20 years the property was managed by Sardar Har Charan Singh, and relative of the owners; but in 1912 a partition was effected. Dumri went to Sardar Umrao Singh, who appointed a new Manager, Sheikh Nawab Uddin; he himself having married a Hungarian lady, while Sardar Sundar Singh has his headquarters at Saraya; Sardar Harcharan Singh continuing to look after this portion of the estate until 1917, when the management was taken over by Sardar Sundar Singh's son, Sardar Kirpal Singh. The two estates together comprise 59 villages assessed at Rs. 16,972 in the Sadr tahsil."

 "The family has a somewhat extensive library, partly in Gorakhpur and partly at Jaunpur."

Page 121, line 24, at end of paragraph, *insert* a new paragraph as follows:—

"OTHER MOSLEM FAMILIES.

"Among other Moslem families of note is that of Nawab Saiyid Mohammed Ali Nasir Khan, which has long been settled in Gorakhpur. The family first came into notice during the Mutiny, when Mir Zahur Ali Khan rendered considerable aid to Government officials. The present representative of the family is an honorary munsif and magistrate and is of a generous and charitable disposition; he received the title of Nawab in 1913 in recognition of his services and his generosity. The estate comprises 63 villages, mostly in the Gorakhpur district, with a total revenue demand of Rs. 11,472. Another estate which may be mentioned is that of Saiyad Mohammed Subhan Ullah, paying an annual revenue of Rs. 12,205. This family, like that of the Sabzposh, is of Arab descent and comes from Sumnan; it settled at Ajodhya at first, but soon transferred itself to Gorakhpur; Saiyad Habib Ullah, the grandfather of the present owner of the estate, was a sub-judge and an honorary magistrate. Another family which has risen into prominence within the last 20 years is that of Khan Bahadur Molvi Mohammed Khalil, whose son, Khan Bahadur Molvi Mohammed Ismail, Bar.-at-Law, is the Chairman of the Municipality and Government pleader."

EXCISE.

Page 158, lines 28—33, *delete* "Lastly . . . this system" and *substitute*—"The same system was extended in 1906 to Hata and Deoria; and the outstill tract was still further reduced in 1909, leaving only a narrow strip along the Nepal frontier, some 290 square miles in area, under this system. There are now only seven outstills, while the average number of

retail shops in the distillery area for the five years 1909 to 14 was 141 as compared with 100 retail shops and 71 outstills in 1908. In April, 1915, the distillery system was replaced by the contract supply system; the distillery at Gorakhpur was given up and bonded warehouses were established at Gorakhpur, Deoria, Padrauna, and Maharajganj."

(EXCISE) REVENUE.

Page 159, lines 11 to 22, *delete* "From the statement . . . population" and *substitute* "During the next two years the income was Rs. 2,61,697, but after the extension of the distillery system in 1909 there was a very considerable rise in the total income, which for the five years ending 1913-14 amounted to Rs. 3,63,593 annually; Rs. 2,01,531 were derived from stillhead duty, Rs. 1,36,392 from licences, and only Rs. 25,670 from outstills. It is curious to find that the extension of the distillery system to Hata and Deoria in 1906 was followed by a great decline in revenue, while its further extension in 1909 resulted in a remarkable increase in the revenue. Again, till 1909 no appreciable rise in the consumption was noticed, the average during the three preceding decades varying from 40,000 to 50,000 though the stillhead duty had materially increased. In the five years ending 1913-14 however the average consumption rose to 72,548 gallons annually, or 22.66 gallons per thousand of population, as compared with 13.18 gallons in Azamgarh and only 9.69 in Basti."

Lines 18 and 19, *delete*: "and further . . . contemplated," *insert* full-stop and *substitute*—

"The following year the Gurkha line were made over to the police, and a recruiting dépôt established at Kundaghat, just beyond the Ramgarh Tal. This necessitated an extension of the notified area boundary towards the east so as to include the dépôt and form a sanitary buffer for its protection; advantage was taken of this opportunity to make the boundary continuous, and a further extension was made towards the north, the boundary being carried close up to the Christian village at Basharatpur. Unfortunately the boundary is to a large extent artificial, but the advisability of further extension seems doubtful. Moreover the railway settlement is included within notified area limits

though its management is quite distinct from that of the notified area and rests with the officials of the railway department."

Page 165, lines 22 to 26 *delete* "for the . . . annually" and *substitute* "For the ten years of its existence the average receipts, derived mainly from a house-tax and a conservancy-tax, have been Rs. 6,472, while the expenditure, devoted mainly to conservancy and lighting, has exceeded Rs. 6,900 annually."

Page 165, line . . . (at the end of paragraph) *insert* "The finances of both are in a very satisfactory condition, the average receipts in Deoria for seven years being Rs. 2,739 and the corresponding expenditure Rs. 2,505; while in Gaura Barhaj the average income for the six years ending 1913-14 is Rs. 11,305, and the expenses amount to only Rs. 10,212."

Page 166, line 3, *add* new sentence "In 1914 Act XX was replaced by Act II of that year and in 1916 this Act was extended to Captainganj."

Page 166. Revise account of D. B., giving details of establishment of Sub-Board at Kasia and Deoria.

Page 168, line 15, *alter* 1896-97 to 1901-02; after "onwards" *insert*—

"It will be seen that the highest figures were reached in 1912-13, the number of scholars being as high as 41,658, while in 1914-15 the number had sunk to 37,162. The main reason for this apparent decline is that fees were introduced in all the district board schools in 1914, and so it became no longer possible for the teachers to show an enhanced attendance by falsifying the registers. There can be no doubt the former figures were at least in part fictitious, and it is pretty certain that, in spite of the introduction of fees, the number of scholars who attend school, as distinguished from those whose names merely exist on the registers, has steadily increased. The district board has now taken over a large number of aided schools, and this, it is hoped, will give a further impetus to primary education."

Page 168, line 16,—page 169, line 28, *delete* the whole paragraph on schools: viz. "Following this . . . schools" and *substitute*—

"In table XIX of the appendix will be found a list of all the more important schools in the district for the year 1914-15, no

correct list of private schools is possible and the total number of institutions can only be roughly stated as about 600, of which 530 are managed or aided by the Government or the District or Municipal Boards, the average daily attendance for the same period is given as 25,720.

“The C. M. S., an account of whose activities in this direction has already been given, maintains several of the more important institutions.

St. Andrew's College was founded in 1901 and till 1916 it used to teach only up to the F.A. standard. Now however instruction is given up to the B. A. standard; and the college has been housed in a new double-storeyed building and a Science department will be added, as soon as finances permit. There is also a hostel in connection with the college for the convenience of students whose parents do not reside in the city.

“St. Andrew's Collegiate High School, or the Mission School as it is generally called, is a much older institution, dating back to 1838. It teaches up to the matriculation standard and has a hostel attached. The Jubilee High School was built originally as an Oriental Zilla School in 1875 and was reconstituted in 1887 as a Municipal High School. In 1907 it was handed over to the district board, but in 1910 it was converted into a provincial school under the immediate control of the Department of Public Instruction. Other English institutions in the city comprise two aided high schools, both recently founded, the Gorakhpur High School and the George Middle School, in addition to the C. M. S. Anglo-Vernacular Middle School at Alinagar, in the rest of the district there is only one Government institution, the King Edward High School at Deoria, which has just been housed in a handsome building.

“There is an aided Middle School at Barhaj, while private schools teaching up to the matriculation standard exist at Lar, Bansgaon, and Dhakwa Bazar. Among other secondary schools the most important is the Government Normal School, which was opened in 1904 in a costly building on which Rs. 1,58,632 were expended, in the magnificent grounds of Mr. Bridgman's bungalow in the Turkmanpur muballa. It accommodates six teachers and 100 pupil teachers drawn from the Gorakhpur and Benare

division and from Gonda and Bahraich some 46 teachers being passed but annually after a course of two years. Attached to this training school is a large Middle Vernacular School. There are in the district 11 other combined Middle and training schools, kept up by the D.B. situated at Dumri and Minwan in the Sadar tahsil, Bansgaon, Barhalganj, and Gola in the Bansgaon tahsil, Lar, and Majhauri in the Deoria tahsil, Padrauna and Kasia in the Padrauna tahsil, and Mahrajganj and Dhanni in the Mahrajganj tahsil, there being none at all in the Hata tahsil.

“Other Middle Vernacular Schools include the Swinton Memorial School maintained by the C. M. S., a district board school at Barhaj, and an aided institution at Hardia in the Sadr tahsil. The Vernacular final examination is now held at three centres in the district, the number of candidates appearing for it being about 900, a fact significant of the growth of Vernacular education of a higher order in the district. Among the primary schools 206 are managed and 232 aided by the district and municipal boards; there are also several private primary schools, such as that kept up by the Tamkoti estate, but no exact statistics of these are available. Nor is the study of other Oriental languages neglected no less than 32 Sanskrit *pathshalas* are aided by the district board, while there are several others which are unaided. There are also several Hindi Mahajani Schools, and elementary schools for the study of Persian, Arabic, and the Quran all kept up by private subscriptions. A technical and industrial school also exists in Gorakhpur, having been founded by Government in August, 1911, when the number of students was 25. At the present time the number is 76, of whom 13 are artisans, 34 juniors, and 29 seniors. Night classes were started in 1912 for both Europeans and Indians employed in arts and trades. Thus it will be seen that, taken as a whole, the district is now well advanced in education; much has been done, though of course much still remains to be done, especially in the case with regard to female education, the girls' schools comprise two Government institutions, 15 under the District Board, 19 aided by the District and Municipal Boards (three of which are maintained by the C. M. S. Zenana Mission) and one unaided

school, as compared with a total of 17 some eight years ago. The growing importance of Gorakhpur as an educational centre may be judged from the fact that in 1908 an inspector's circle was created with headquarters at Gorakhpur; an assistant inspector has been here since 1904 and his staff consists of one deputy and six sub-deputy inspectors of schools."

Page 169, line 28 to page 170, line 9, *delete* the whole paragraph "Real . . . former" and *substitute*—

"LITERACY.

"In the last few years there has been a steady increase in the total number of literates in the district. In 1872 it was calculated that barely two persons in a thousand could read and write; by 1881 the proportion had risen to 3·6 per cent. of the males and ·08 of the females. Ten years later the figures were respectively 4·4 and 15 per cent., while in 1901 about 5·5 per cent. of the male, and ·18 per cent. of the female, population came under this category. In 1911 a stricter literacy test was applied, the term being explained as the ability to write a letter and read the answer to it, instead of merely being able to sign one's signature, hence in 1911 only 5·6 per cent. of the male, and ·3 per cent. of the female, population were returned as literate; the corresponding provincial figures were 6·1 per cent. for males and ·5 per cent. for females. Comparing distribution of literacy by age-periods in 1901 and 1911 we find that the figures for the early age-period are stationary at 7 per mille for males; the figures for the two intermediate age-periods show slight increases, 56 males and three females per thousand of ages between 10 and 15 being literate and 81 males and five females of ages between 15 and 20; on the other hand, in the adult age-period a decrease of two per thousand is to be found, the present figures being 79 per mille for males and three for females. These figures show clearly that education has been making steady progress and also show to what extent those who had learnt in the past how to read and write had forgotten the art. The spread of education however is not very even; 57 out of every 1,000 Hindu males are literate, the figure for Mahomedans being only 41 per mille; on the other hand as

regards females the corresponding figures are two per Hindus and four for Mahomedans. A large proportion of the Kayasth community is literate but very few Chamars are able to read and write. Instruction is almost invariably given in the Nagri character in preference to the Persian, which is used only in the towns and is for the most part confined to the Musalman element. Of the literate population excluding those who used English, 84·4 per cent. employed the Nagri and 6·1 the Persian; 8·2 per cent. were acquainted with both, 54 per cent. of whom knew Urdu better than Hindi. The figures for English education do not compare favourably with those for the rest of the province; though considerable improvement has taken place; in 1891 only five males and one female per 10,000 were literate in English; by 1901 the corresponding figures were 19 and two, while in 1911 the figures stood at 25 and two respectively as compared with 40 males and even females per 10,000 for the whole of the United Provinces."

DISPENSARIES.

Page 171, lines 7 to 10, *delete* "The average . . . itself" and *substitute* "The annual attendance at this and the district board dispensaries in 1915 was 384,710, of whom nearly one-fifth were treated in Gorakhpur itself and 13 per cent. in Barhaj. There are also a varying number of travelling malaria dispensaries at which 16,593 cases were treated in 1915."

Alterations and Additions to Part A of the Basti District Gazetteer, bringing it up to date (1912).

CHAPTER I.

Page 13.—FLOOD OF 1910.

There was a heavy flood in the Rapti and its tributaries in 1910. It extended over the Khalilabad, Bansi and Domariaganj tahsils.

In the Khalilabad tahsil it spread over an area of 7 miles by 5 miles, covering 74 villages and lasting for 5 days. Everywhere the flood water reached the level of the village sites, and in some places the villages themselves were washed away.

The exact area affected in Bansi tahsil is not known, but the flood lasted there for eleven days. Ordinarily the depth of the water over the low-lying tracts is 2 feet: in this case it rose to 5 feet. The breadth of the Rapti river (in years of normal rain 462 feet) increased to 1,575 feet. Under the orders of the Collector the tahsili officials organized rescue parties, which secured boats from Uska bazaar and other places and saved the lives of many villagers and animals. Little damage was done to property. The standing crops suffered most.

In Domariaganj tahsil the loss was not so severe as in the other two tahsils and only slight damage was done to the crops.

Page 28.—CATTLE CENSUS OF 1909.

According to the cattle census of 1909 the number of plough animals in the district (including male-buffaloes and excluding young stock) was 5,03,434, giving an average of 2.18 animals per plough.

The average area under cultivation per plough was 5.83 acres. In that year the district contained 4,99,977 bulls and bullocks, 2,85,998 cows, 3,457 he-buffaloes, 1,04,341 she-buffaloes and 3,88,859 young stock. It will be noticed, on a comparison with the figures of the previous census, that there has been a decrease in all cases except in that of young stock. This is attributed to a

rise in prices. Without a corresponding rise in the purchasing power of the lower orders and also no doubt to forced sales due to scarcity. The price of an ordinary pair of plough-bullocks, which ranged from Rs. 20 to Rs. 40 when the present Gazetteer was published, has nearly doubled.

SHEEP AND GOATS.

The enumeration of 1909 showed 43,311 sheep and 2,48,881 goats, against 35,852 and 2,41,092 respectively of the census of 1904.

The price of a sheep is as a rule Rs. 4 per head, and that of a skin a little over Re. 1.

OTHER ANIMALS.

The census showed a total of 10,150 horses and ponies, 80 mules, 6,985 donkeys and 104 camels. The decrease in the number of horses and ponies is fortuitous.

Page 32.

The mortality from plague, which was 4,044 in 1905, went on gradually decreasing until 1909, when it fell to 5 only. In 1910, 658 persons died of the disease. But in 1911 the mortality suddenly increased to a figure in excess of that of 1905, i. e. 5,477 deaths. It was 4,153 in 1912. Rat mortality proves that the disease still subsists.

CHAPTER II.

AGRICULTURAL STATISTICS OF 1320 FASLI.

Pages 35 to 39.—CULTIVATED AREA.

The area of the district as shown in the latest professional survey is 1,786,888 acres; and as shown in the village papers (i. e. sadar kanungo's milan khasra statement for the year 1320 Fasli) 1,796,625 acres.

The total cultivation was 1,271,787 acres, or 70·78 per cent. of the total area. A revised table (No. 5) showing statistics of cultivation and irrigation for 1320 Fasli is appended herewith. 10·3 per cent. of the total area is barren waste. 2·7 per cent. is occupied by groves. The balance 16·2 per cent. is culturable waste, against 15·3 in 1906. The areas represented by these percentages were 65,450 acres culturable waste, 1,60,894 old fallow, and 64,156 new fallow.

DOUBLE CROP AREA.

The area bearing two crops was 4,33,836 acres, or 34·11 per cent, of the total cultivated area: against 5,08,900 acres, or 39·57 per cent. in 1904. The decrease was uniform all over the district. Possibly it is due to the increasing preference for "jarhan.". The proportion of double crop area was greatest in Harraiya tahsil (41·02 per cent. of the cultivated area); and lowest in Domariaganj tahsil (28·36 per cent. only).

Page 55.—FAMINE OF 1907-8.

The rainfall in 1907 was very deficient, the total mean rainfall for the district from June to September 1907, being 21·15 against 42·25, the normal for the period. The result was an almost entire failure of the rice-crop: especially in the Domariaganj tahsil, and in the portion of the Harraiya tahsil, lying to the north of the Railway line, where the late rice crop is the chief product. The outturn of kharif crops for the whole district was 43 per cent. of the normal.

Relief operations were confined to the above tracts. Two poor-houses were opened; one at Basti on the 15th December 1907, and the other at Domariaganj on the 22nd.

Village works on the aided system were started in January 1908. A test-work was started on the Basti-Domariaganj road on the 6th February 1908, but it was not found necessary to convert it into a regular famine work till March 1st, 1908. The number of persons in receipt of relief rose to 20,000 by the middle of March 1908.

The rainfall for the period from January to March 1908 was a little above the normal. Consequently the rabi crop was everywhere in the district except in the Domariaganj tahsil fairly good, the outturn being not less than 86 per cent, of the normal. In the affected tracts, where only half the normal area could be sown, the outturn was proportionately only 7 annas in the rupee. The result was that, after the harvesting of rabi crops had been completed, the number of labourers on the relief works gradually went on increasing until the middle of May 1908. It then reached 44,676: of whom 22,500 with 10,650 dependants were on relief works, 4,300 on aided works, 7,000 in receipt of gratuitous relief and 156 in the poor-houses.

In June 1908 the rainfall in some tahsils was above the normal, and everywhere sufficient for sowing purposes; and the prospects of the kharif became satisfactory. Labourers accordingly abandoned the works in order to resume their agricultural operations. The departmental works were replaced by civil works. These in turn were ultimately closed by the 15th July 1908. The number receiving gratuitous relief increased a little in consequence (rising to 25,000), and then began to fall. Gratuitous relief was stopped at the end of August 1908, and the two poor-houses were closed at the end of September 1908.

The works in all cases (both P. W. D. and C. W.) took the form of tanks. These were not completed, owing to the early and copious rainfall in June and July 1908. So far, however, as they were constructed, they have made excellent reservoirs for the storage of surplus rain water for irrigation and drinking purposes.

The expenditure incurred by Government through the P. W. D. amounted to over 2 lakhs of rupees. 37 civil works were constructed at a cost of Rs. 1,16,400, and over Rs. 1,07,900 was spent in gratuitous relief.

Rupees 72,900 was given as advances to zamindars for village works. All these works took the form of tanks.

In the kharif kist Rs. 60,955 were suspended and Rs. 68,458 remitted. In the rabi kist the corresponding figures were Rs. 14,210 and Rs. 44,822. Advances under Acts XIX of 1883 and XII of 1884 were made as detailed below :—

			Rabi.	Kharif.
			Rs.	Rs.
For seed	2,66,862	3,92,858
For katcha wells	54,477	Nil
For purchase of bullocks	Nil	57,800
For pakka wells	Nil	2,95,002
For repairs to wells	Nil	6,816

In addition Rs. 10,000 was advanced to the District Co-operative Bank, Basti, for distribution to cultivators. There was no scarcity of fodder, and no unusual mortality among cattle is believed to have taken place. About 10,000 cattle were sold owing to scarcity.

Page 58.

The wages of all classes of labourers have risen considerably. For instance the wages of a carpenter or blacksmith or mason, which ranged from 3 to 4 annas in former years, have now risen to 5 to 7 annas per diem.

Page 67.

The length of metalled roads has increased from 51 to 98 miles. In addition, over 28 miles of unmetalled roads have been added to the list of District Board roads.

CENSUS OF 1911.

Page 72.—To be added after *line 7* in a separate paragraph.

The census of 1911 showed a total population of 1,830,421 persons: a decrease of 15,732 persons on the census of 1901. The average density works out to 653.2 per square mile, against 670.9 in 1901. This decline may be attributed to the famine of 1907-8 and to the havoc caused by successive years of plague. Notwithstanding this decline a density of 653.2 per square mile in a district with no large towns places Basti high in respect of population among the districts of the United Provinces. Of the tahsils Khalilabad stands first, having a density of 716: and Basti second with 697 per square mile. The rest in order of density are Bansi, Harraiya and Domariaganj, with 678, 660 and 522 respectively.

CHAPTER III.

HISTORY OF THE RAJAS.

Page 91.—*Line 14* to be added after 'Ratan Sen Singh.'

The Raja died in 1913, and was succeeded by his son Lal (now Raja) Ratan Sen Singh.

To be added in *line 18* after 'Rs. 1,21,685.'

Since then the State has diminished greatly. At present it comprises 339 villages in Basti district, with an area of 74,757 acres and revenue of Rs. 76,484; and 3 villages in Gorakhpur district, with a revenue of Rs. 795.

Page 92.—*Line 26*, to be added after 'a few villages in Fyzabad.'

The estate of Raja Narendra Bahadur Pal at present consists of 70 villages in this district, paying a revenue of Rs. 19,004; and a few villages in Fyzabad. That of Mangal Prasad Pal con-

sist of 24 villages paying a revenue of Rs. 7,090, all in this district.

Page 94.—Line 15 to be added after 'within twelve years.'

The debt has since been liquidated.

Page 94.—Line 28, to be added after 'paying a revenue of Rs. 17,287.'

He has since added to his estate, which now consists of 85 villages paying a revenue of Rs. 20,037.

Page 95.—Line 20 to be added after 'in Basti East.'

Babu Ram Bakhsh Singh has since died. His son, Babu Bishnath Bakhsh Singh, inherited his property, which amounts to 37 villages paying Rs. 5,436 as land revenue.

Page 96.—Line 7 to be added after 'from the Raja of Bansi.'

The property has since dwindled to three villages only, paying at present (1913) Rs. 535 as land revenue.

Page 96.—Line 12 to be added after 'with a revenue demand of Rs. 19,102.'

At present the Babus of Rudhauri consist of (1) Bhaiya Badri Pershad Singh owning 154 villages and paying a revenue of Rs. 12,639, (2) Thakur Jailal Singh owning 44 villages and paying Rs. 6,872 as land revenue, (3) Babu Lalta Pershad Singh and Babu Mahadeo Pershad Singh, jointly holding 21 villages and paying a revenue of Rs. 5,915, (4) Babu Sarfraz Singh holding 23 villages and paying a revenue of Rs. 2,709, and (5) Babu Durga Parshad Singh holding 37 villages and paying a revenue of Rs. 2,224.

Page 97.—Line 3, to be inserted after the sentence ending with '1897.'

After the death of Pandit Sri Nawaz Pande his estate descended to his heirs (consisting of his sons Nageswar Prasad Pande, Dwarka Prasad Pande, Ram Prasad Pande, Ram Kirpal Pande and Baldeo Prasad Pande). They own 19, 9, 23, 22 and 21 villages respectively: and pay land revenue of Rs. 1,772, 534, 1,932 2,126 and 2,251.

Page 96.—Line 24 to be added after the sentence ending with 'Rs. 12,901.'

On the death of Ram Harakh Chaudhri, his heirs (1) Mangal Prasad, (2) Raja Ram and (3) Rajeshwari Prasad inherited his

property. They jointly pay Rs. 6,707 as land revenue.

Page 96.—Line 28 to be added after the sentence ‘ending with landlords of the district.’

Sabus Mathura Prasad and Ram Pratab inherited the property, on the death of Pandit Deokali Prasad. They now hold 33 villages, and pay a revenue of Rs. 6,682.

CHAPTER IV.

Pages 111-112.

Formerly the executive staff of the district consisted of a Magistrate and Collector, 5 Magistrates of the first class, 1 with third class powers, and 5 Tahsildars.

The present sanctioned scale of the district is (besides the Magistrate and Collector) 6 Magistrates of the first class, 1 Treasury Officer, 1 Assistant Collector, first class, and 5 Tahsildars.

In addition there are 13 Honorary Magistrates; 6 of whom form a bench at Basti with jurisdiction over the police circles of Basti, Kalwari, Sonhan, Rudhauli, Budhabandh and Captainganj. All the Honorary Magistrates, with the exception of Raja Pateshwari Pratab Narain Singh of Basti, Raja Ratan Sen Singh of Banai, Babu Jai Lal Singh of Rudhauli and Rai Nageshwar Prasad Singh Bahadur of Marwatia (who hold second class powers), are invested with the powers of a third class magistrate.

Formerly cases committed to Sessions used to be tried by the Sessions Judge of Jaunpur, who came to Basti for the purpose every alternate month. Under the Greeven Scheme the system has now been altered, and Sessions cases are tried either by the Additional Sessions Judge of Gorakhpur sitting at Gorakhpur or by an Additional Sub-Judge and an Assistant Sessions Judge sitting at Basti.

Criminal appeals are heard by the Additional Sessions Judge of Gorakhpur. Original civil suits are tried by the Munsifs of Basti and Bansi, and the Subordinate Judge stationed at Basti. Appeals from the decisions of the Munsifs are heard by the Subordinate Judge, who has been empowered to do so under the Greeven Scheme. Appeals from his decisions valued at Rs. 5,000 and under are disposed of by the District Judge and Additional District and Sessions Judge of Gorakhpur (and Basti) stationed

at Gorakhpur. The Subordinate Judge and one of the Munsifs are stationed at Basti, and the other Munsif resides at Bansi.

Page 124.

Formerly there were 26 thanas in the district. Four of them (viz: Chapia, Bankata, Harraiya and Barakoni) were abolished in October 1908, being amalgamated with adjoining stations. At present there are 22 police stations, with one outpost at Harraiya. This scheme in turn is under revision in connection with the recasting of the Gorakhpur and Basti districts.

Page 138.

The present Veterinary Staff in the district consists two of Veterinary Assistants on itinerating duty and 1 Veterinary Assistant stationed at the Veterinary Dispensary, Basti. No Veterinary Establishment was entertained in the district previous to the year 1906.

AZAMGARH.

Supplementary notes and statistics to

VOLUME XXXIII

OF THE

**District Gazetteers of the United Provinces
of Agra and Oudh.**

ALLAHABAD :

Printed by the Superintendent, Government Press, United Provinces.

1916.

Notes on District Gazetteer, Azamgarh.

Page 9.

The area of Narja Tal and Ratoi Tal is incorrectly given. It should be—"cover some 1,000 and 4,500 acres respectively".

Page 17.

The price of a pair of ordinary bullocks has now risen to about Rs. 60 and that of a team of four of superior breed to Rs. 200. The figures given in lines 13 and 14 of page 17 should be corrected accordingly.

Page 37.

In the last line but four of the page the words "a passing" should be omitted, and the last sentence should be struck out, *substituting* the following :—

"The area under 'san' is now considerable, the average for the years 1319 to 1321 having been 8,355 acres. The greater part of the hemp is now grown for export, and a number of presses worked by manual labour have been set up at Atraith, Koelsa, Rani Sarai and other places, and there is one at Bilaisa close to the Azamgarh Railway Station".

Page 39.

The area under poppy has fallen very greatly and is now about 2,400 to 2,500 acres only.

Page 56.

The third sentence under manufactures should *read* as follows :—

"Of the remainder, indigo was the most important and at one time occupied a prominent position, but it has now practically disappeared. In 1321 F. the only place where indigo was prepared in any appreciable quantity was on the Kajha Estate."

Page 64.

The last sentence of the paragraph under trade should be *omitted*.

Page. 66.

Under Railways *delete* the part of the paragraph after the words :—

"There are altogether 94 miles of Railway in Azamgarh".

Page 67.

In line 14 for the word "short" the word "considerable" should be *substituted*, and in lines 17 and 18 for the words "has since only being" the words "was till recently only" should be *substituted*. The length of metalled roads should be shown as 217,371 miles and of unmetalled roads as 514,267 miles.

After the sentence ending in line 12 should be *added* : "From Ambari on this road a branch some ten miles in length has now been opened to Ahraula, the headquarters of the Mahul Tahsil".

Page 68.

In line 5 the words "while sarais" &c. to the end of the sentence, should be *omitted*. In line 9 should be *added* "Ahraula and Jianpur," and in the following line the word "five" should be *substituted for* "three".

Page 73.

The following paragraph may be *added* regarding the census of 1911 :—

"At the census of 1911 it was ascertained that the total population amounted to 1,492,818, the males exceeding females by less than 7,000. The number of Hindus was returned as 1,304,582, as compared with 1,313,372 in 1901, and that of Muhammadans as 186,843, as compared with 214,631 in 1901. The decline in the population of the district was according to these figures mainly due to the remarkable decrease among the Muhammadans and to some extent this was doubtless due to the very great reluctance shown by the weaving community in evacuating their houses in times of plague, and the consequent high mortality suffered by them. The unusually heavy mortality in 1905, 1909 and 1910 should be noticed. In the last named year the deaths exceeded the births by nearly 21,000, the number dying from plague amounting to nearly 22,000 and from cholera to nearly 12,000, the two together forming the severest affliction which has fallen on the district within recent years."

Page 74.

After "Maharajganj" (8th line from bottom of page) should be *inserted* the following sentence :—

"The census figures of 1911 are very misleading as regards most of these towns, for the enumeration was made at a time

when plague was raging violently and when the towns were to a large extent evacuated."

Page 75.

For the first four words of opening sentence under Sex *substitute*.

"At the census of 1901" and after it the following should be *inserted* :—

"This difference, as already pointed out, had entirely disappeared by 1911, and there was a small preponderance of males, due probably to the increased liability to plague suffered by women, and particularly by those strictly confined to their homes by reason of the pardah system. The following sentences must be read as applying to the census figures of 1901."

Page 98.

For the last sentence under Language and Literature the following should be *substituted* :—

"There are no newspapers published in the district and only two small presses, one at Azamgarh known as the Mahtab Press and the other at Kaptanganj: both of these are used solely for the printing of forms and notices."

Page 107.

First line of third paragraph *read* "Raja Muhammad Shah."

Page 109.

End of 1st para. after the word "Gorakhpur" *read* "the present Raja who is the son of Babu Khaliq Shah was appointed an Honorary Magistrate for the Azamgarh municipality in 1913."

Page 111.

In 3rd line of the 2nd paragraph *read* : "Rani Dhandei Kuar."

Page 112.

Omit the first sentence.

In the second sentence *for* the words "is now held by women, it" *substitute* :—

"which is now held by his grandson, Mir Mehdi Husain," &c.

Lower down insert the words "the late" before "Harbans Deo Narain Singh," omitting the word "has" twice.

In the last sentence of this paragraph instead of "last settlement" *read* : "at the sixth settlement."

Page 113.

In line 13 *omit* : "It is likely to be soon redeemed".

Page 121.

In 4th line *read* : "and six" instead of "four", and *omit* "and one with powers of the third class."

In 4th sentence *read* : "seven members".

The 5th sentence should read as follows :—

"One of the members, Rai Gopi Kishan Sahib, holds office for life and the rest for fixed periods."

The next sentence should *read* : "Within the notified areas of Mau and Mubarakpur and in several other smaller towns there are also honorary magistrates invested with third class magisterial powers."

In the next sentence *read* : "three" instead of "two" munsifs.

After this sentence *insert* the following :—"All hold court at Azamgarh, the separate court at Muhammadabad having been abolished in 1914. The jurisdiction of the Azamgarh munsif and additional munsif extends to tahsil Azamgarh", &c.

In last sentence of first paragraph *read* : "sub-deputy opium agent" instead of "assistant opium agent".

Page 139.—NOTE.

I have not re-written the paragraph regarding police stations. The changes mentioned therein as about to take place came into effect some years ago, but I think the paragraph may be allowed to stand as it is.

Page 140.

The last sentence but one of the paragraph under Crime should read : "The registration of Doms and of certain Bhars and Pasis has been made under the Criminal Tribes Act of 1913. Pasis are not numerous, but much of the petty thefts &c."

Page 142.—NOTE, 1915.

The local distillery was abolished in 1901, and during the current year the district is being brought entirely under the contract system, with bonded warehouses at Azamgarh and Ghosi. Eighty eight shops have been settled under the new system, the license fees mounting to Rs. 32,949. Still-head duty for 1913-14 amounted to Rs. 42,828-14-6, the rate being Rs. 2-10-0 per gallon.

Page 147.

At the present time, in addition to the head office at Azamgarh, there are 28 sub-offices and 27 branch offices in the district, as against 46 offices of all kinds in 1911.

There are now combined post and telegraph offices at Azamgarh head office, Azamgarh City, Dohrighat, Ghosi, Mau Nath Bhanjan, Mubarakpur, Muhammadabad and Sagri.

Under the head of municipality *read*: "The income of the municipality up to 1914 was raised" &c. In the following sentences change "is" to "was."

Add: "From April 1st 1914 a tax on circumstances and property was introduced to replace octroi, and the tax on professions was merged in this. An additional source of income is obtained from a drain and cess-pool tax of a semi-voluntary nature."

Page 148.

In line 8 of the 2nd para. *read*: "Committees of four members."

Under the paragraph on Act XX towns *add* the following:—

"[Note, 1915. These towns came under the Town Areas Act (No. II of 1914) when that Act came into force. This Act introduces the elective system into small towns, but at the same time provides for more effective management and control as regards sanitary measures.]"

Page 151.

Insert in line 10 of paragraph under 'Schools':—

"[Note 1915. The Azamgarh National School lost its status as a High School a few years ago and is now known as the George National School. The Mission School has an average attendance of some 350 to 400 scholars. The number of middle vernacular schools has been increased by the opening of additional schools at Mehnajpur, Thekma, Koelsa and Chiriakot and the total number of boys enrolled exceeds 1,829. There are now 118 upper primary and 44 lower primary schools belonging to the district board, and 137 others receiving grants-in-aid, and the number of girls schools is now 43 including 39 aided girls schools.]"

Page 152.

In the end of the last sentence of the 2nd paragraph *add*: "and Bibipur in the Sagri tahsil."

After the third paragraph *add* :

"[Note, 1915. The principal change to be noted is the recent establishment of travelling dispensaries in the district, the number varying between three and four according to the staff available. Each of these is in charge of a sub-assistant-surgeon on peripatetic duty. The primary object of their introduction into this district was to provide quicker treatment of plague cases and readier means for inoculation against that disease. These dispensaries are provided with a small stock of the medicines most commonly required and their usefulness has extended considerably beyond what was originally expected.]"

In the last line of this page *substitute* "a few" for "two" acres, and *omit* the last seven words on page 153.

Page 191.—AHRAULA.

In the last line but one *read* : "is connected with Mahul and Ambari by a metalled road, and with Phulpur, Atraulia " &c.

Page 195.—AZAMGARH.

In line 10 *read* : "North of the civil station."

Page 196.

3rd paragraph *read* : "five" instead of "four" wards and *add* : "a fifth having been formed in 1914 when the boundaries of the municipality were extended to include the civil lines and the road going to the railway station. Of the four original wards that of Ailwal comprises," &c.

Page 197.

Line 15 *read* : "George National School" instead of "National High School."

Page 198.

Line 5 *omit* "last," and *add* in line 13 after "VI of 1868" the following sentences :—

"At the census of 1911, which took place when the town was to a large extent evacuated owing to a severe outbreak of plague, the population was returned as 10,834. This, however, is obviously an unreliable figure, and the normal population may be taken to be about 17,000 or, with the new additions recently made to the municipal area, over 18,000."

Add a note at the end of the paragraph :

"In 1914 octroi was abolished and its place was taken by a tax on circumstances and property, the total average income of the municipality being now about Rs. 27,000 per annum."

Page 204.—BELHA.

Last line but three read: "Tandwa."

Page 235.

Line 11 read:—

"Once metalled, but for many years reduced to the second class, and now again being remetalled passes through" &c.

Page 237.—JIANPUR.

In the last line but four *insert* the following sentences:—

"This place is the home of the small Mirshikar community, of whom between 30 and 40 have gun licenses and who live on the produce of their shooting and netting. Their personal appearance is against them, but they are as a matter of fact an obedient and orderly tribe who give no cause of trouble to the administration. Under recent restrictions their livelihood has become somewhat precarious, and a few of them have taken to cultivation on a small scale."

Page 241.—KOELSA.

In last line but two, for "upper primary" read: "vernacular middle school with primary sections,"

Page 243.—LALGANJ.

Last line but two *insert*: "branch dispensary" before "primary school."

Page 246.

In line 4 after "Didarganj" *insert*: "which is now metalled as far as Ambari."

Page 253.

In line 5. For the last seven words *substitute*: "which branches off from the Azamgarh-Jaunpur road near Rani-ki-Sarai."

Page 256.

Delete the words after. "The place is an important Railway Junction" to the end of the paragraph.

Page 259.

Last line but two of 2nd paragraph *substitute*: "just East of" for "through."

Page 260.—MUBARAKPUR.

Line 3 after "unmetalled road," *insert*: "and also by a metalled road to the Jahanaganj railway station which crosses that from Mau to Azamgarh about three miles south of the town."

Page 265.

Last line but three *read*: "and was till recently being managed" etc.
